reality technologies virtual augmented and mixed reality or XR and how this news corresponds with the marketing of XR
products Focusing on a group of recently emerging technological products the book offers in depth analysis of the news
coverage of XR technologies and explores the overlap between news discourse and promotional discourse by comparing the
way these products are framed in the news and their marketing materials Using both quantitative and qualitative data it
discusses the topics covered in XR news as well as the sources used and the specific framing techniques that appear in both
XR news and marketing materials In addition to these findings it also provides a set of frame categories that can be used by
