Navigating Theory, Methodology, and Researcher Development in Doctoral Research Throne, Robin, 2025-06-25

Doctoral research involves more than investigating a specific topic. It requires navigating a complex landscape of theory, methodology, and personal development as a researcher. These three elements are interconnected as theory shapes questions asked, methodology guides answers, and the process produces independent scholars. Successfully managing these aspects demands reflection, adaptability, and a deep engagement with academic traditions and new research practices. This may produce new knowledge while fostering the growth of researchers who contribute meaningfully to their fields. *Navigating Theory, Methodology, and Researcher Development in Doctoral Research* explores various practices in doctoral research. It examines evolving methodologies, theories, and developments for improved research applications. This book covers topics such as higher education research methods and social science and is a useful resource for librarians, educators, academicians, researchers, and scientists.

Your Guide to Successful Postgraduate Study Geoffrey C Elliott, Karima Kadi-Hanifi, Carla Solvason, 2018-03-14 The leap between the undergrad and postgrad can sometimes come as a surprise, especially if you've been out of education for a while. Postgraduate study involves applying skills and knowledge in a more sophisticated and advanced way than was required during your degree. *Your Guide to Successful Postgraduate Study* demystifies some of the expectations of post grad study and outlines tools and strategies for developing skills that will improve your work throughout the whole of your post graduate course. This book advises you on how to decide what to read and how best to read it, produce engaging outputs in writing or speaking that are convincing and engaging, pursue academic arguments and show evidence of research reading, maximize your employability after graduation. Get ahead of the game and equip yourself with the skills needed to supercharge your postgraduate work. The Student Success series are essential guides for students of all levels. From how to think critically and write great essays to planning your dream career, the Student Success series helps you study smarter and get the best from your time at university. Supervising the PhD Sara Delamont, Paul Atkinson, Odette Parry, 1997 This book provides everything you ever wanted to know about PhD supervision but were afraid to ask. It is a practical, no-nonsense handbook for both the novice and the experienced higher degree supervisor. The novice will find a developmental sequence of advice guiding them through all the stages of supervision from the first meeting to viva and beyond. The experienced supervisor will find fresh ideas to improve practice and solve problems. Based both on research among laboratory scientists

and social scientists and on many years of experience the book also draws upon humanities examples and so is invaluable to academics in all disciplines At a time when there is increasing pressure to ensure quality provision to improve the PhD completion rate and to turn out employable graduates the need for this practical guide is obvious **Mastering The VIVA** Assoc. Prof. Dr Mohd Farid Shamsudin, Assoc. Prof. Dr Affendy Abu Hassim, 2023-10-22 This book is dedicated to all PhD candidates in social sciences preparing for their viva examination We wish you all the success in this important milestone in your academic journey We hope this book will provide practical advice and strategies to help you answer viva questions effectively and confidently May you find this book a valuable resource in your preparation and benefit from it The Psychologist, 1995 Assessing the Viva in Higher Education Stephen Dobson, 2017-08-24 This book makes the case for a revival in interest in the viva As an oral assessment of a treatise or dissertation or of a student's performance in art or dance the viva has a long history dating back to the time of the Greeks It can be found today in the form of professional vocational and academic vivas where a judgment of oral performance is required to gain entry into a profession or community of scholars In a time when there are scandals about students selling essays to other students the viva provides a fertile ground for probing the student to see whether they are in fact the authors of the work being assessed and know its content and how to think cognitively or otherwise Given that we actually know so little about the viva the book theorises the viva based on a unique sample of vivas that have been filmed or in which the author himself has been participant and discusses why its format is so different in Anglo Saxon languages and Latin and other languages The book offers educational policy makers and examiners a trade off between arguments in support of the viva and the demand for other ever more cost effective forms of assessment as the numbers of both undergraduate and postgraduate students threaten to increase It also argues that with demand in the labour market for qualified graduates who are better equipped with transferable skills such as the ability to communicate complex ideas verbally in a competent well argued fashion and not merely through the use of rhetoric what appear to be cost effective forms of assessment in the short run e.g written exams with standardised questions or multiple choice may actually in the long run be of less value if we are investing in a future workforce with so called 21st century communication skills If the viva were abandoned the student would be robbed of the opportunity to stage a defence
