

Teaching is part of a life-long learning process. For effective teaching, teachers must be good learners. This certificate program in college teaching provided me with many opportunities to think about my teaching career. In this section of my teaching ePortfolio, I will answer several questions regarding teaching, ePortfolio, and the certificate program.

What was the most striking or surprising thing you learned about yourself and about teaching as you developed your ePortfolio?

Through the ePortfolio development process, I realized that teaching is one of the most difficult activities I will perform in my life. Knowing or understanding subjects does not necessarily mean I will be able to teach the subjects well. To enhance students' learning, I must create an appropriate learning environment through various teaching strategies and presentation methods. There is no single best solution; I should continuously try new things and improve my teaching skills.

Based on the materials you wrote, what will be your greatest strength as a teacher?

As I discussed in my teaching philosophy statement, I believe in the importance of repeated exposure to a subject. For "repeated exposure," I should prepare well-organized class materials so students can recall previously taught materials easily. My greatest strength as a teacher is my organization skill. I will prepare very organized lesson plans and slides for my classes.

In addition, I always like to explore new subjects – I am very flexible and will change my lesson plans if needed. I will continuously revise my teaching materials. This way, I can provide the most recent, updated information to students.

What will be your greatest challenge as a teacher?

Increasing students' engagement is the greatest challenge as a teacher, especially in the basic lower-level courses. Many students may take such basic introductory courses without strong motivation. As a student, grades are important, of course; however, I want to teach students that applying (or at least recalling) what they learned in their classes, even after college, is much more important than just focusing on class grades.

In addition, balancing between "be strict" and "be flexible" is also a great challenge for me. I want students to follow my policy, such as late work policy. However, I want to be flexible to meet students' needs and interests. Being too strict may damage students' interest and participation in the class, but being too flexible can also hurt students' engagement in the class. I should improve my teaching method to create a good teaching and learning environment.

How did the combination of workshops, experimental learning, assignment development, syllabi construction, and lesson plan creation lead to new understanding about teaching?

The combination of teaching workshops, teaching classes, class material development, and actual teaching provided a great opportunity to enhance my teaching skills. I was able to learn basic teaching principles from teaching classes, apply teaching principles in class material development and actual teaching, and learn new teaching methods and issues from teaching

Sample Reflection Paper On Seminars

David Kirk

Sample Reflection Paper On Seminars:

Why the First-Year Seminar Matters Christine Harrington, Theresa Orosz, 2018-08-10 Why the First Year Seminar Matters Helping Students Choose and Stay on a Career Path provides an overview of the Guided Pathways movement and the critical role that the first year seminar can play in setting the stage for student success After reviewing the extensive history and research on first year seminars Harrington and Orosz suggest that the time is right for colleges and universities to re imagine the first year seminar course within the Guided Pathways framework More specifically by increasing the focus on career exploration and decision making and addressing key success skills students need the first year seminar can serve as an essential foundational element of Guided Pathways Readers will find the practical suggestions on how to engage in backward course redesign and the making the case data helpful as they aim to address equity gaps and require this course of all incoming first year students

Proceedings and Papers of the Second Technical Conference of the Printing Industry Held in Harding Hall, Government Printing Office, March 16-17, 1931, Sponsered by the Printing Industries Division of the American Society of Mechanical Engineers, with the Government Printing Office and the United Typothetae of America as Joint Hosts United States. Government Printing Office, 1931 Papers Read at the Conference , 1970

The First Year of College Robert S. Feldman, 2017-12-28 This book is premised on a very powerful social educational concern about college retention rates one third of first year students seriously consider leaving college during their first term and only half of all students who start college ultimately graduate This book examines the first year of college from a variety of perspectives to paint a comprehensive picture of the intersecting challenges facing today s students and higher education institutions Technological advances increases in college attendance costs and increasing political pressure on colleges to prove their value have changed the landscape of the first year of college but researchers have identified new approaches to improve student and institutional success that have shown considerable success and promise In this comprehensive volume top educational researchers explore topics of student success persistence and retention in the first year of college

Supporting Self-Regulated Learning and Student Success in Online Courses Glick, Danny, Bergin, Jeff, Chang, Chi, 2023-03-07 Students who self regulate are more likely to improve their academic performance find value in their learning process and continue to be effective lifelong learners However online students often struggle to self regulate which may contribute to lower academic performance Likewise less experienced online teachers who are in the process of implementing or have implemented a shift from in person to distance learning may struggle to enable their students to employ effective self regulation techniques Supporting Self Regulated Learning and Student Success in Online Courses examines current theoretical frameworks research projects and empirical studies related to the design implementation and evaluation of self regulated learning models and interventions in online courses and discusses their implications Covering key topics such as online course design student retention and learning support this reference work is ideal for administrators policymakers
