### Rhetorical Analysis of Cory Doctorow's

#### "Why I Won't Buy an iPad (and Think You Shouldn't, Either)"

Cory Doctorow's article on *BoingBoing* is an older review of the iPad, one of Apple's most famous products. At the time of this article, however, the iPad was simply the latest Apple product to hit the market and was not yet so popular. Doctorow's entire career has been entrenched in and around technology. He got his start as a CD-ROM programmer and is now a successful blogger and author. He is currently the co-editor of the *BoingBoing* blog on which this article was posted. One of his main points in this article comes from Doctorow's passionate advocacy of free digital media sharing. He argues that the iPad is just another way for established technology companies to control our technological freedom and creativity. In "Why I Won't Buy an iPad (and Think You Shouldn't, Either)" published on Boing Boing in April of 2010, Cory Doctorow successfully uses his experience with technology, facts about the company Apple, and appeals to consumer needs to convince potential iPad buyers that Apple and its products, specifically the iPad, limit the digital rights of those who use them by controlling and mainstreaming the content that can be used and created on the device.

The purpose of the article is to convince consumers that the iPad is not a worthwhile thing to buy because it has very limited uses outside of the set content, as well as technological problems and the potential to quickly become obsolete. Cory Doctorow wrote this article stating his negative opinion of the iPad in the wake of enormous media hype over the iPad's release. Apple has proclaimed the iPad as a technological revolution, but Doctorow disagrees. He made

George E. Newell, David Bloome, Alan Hirvela, 2015-06-05 Focused on the teaching and learning argumentative writing in grades 9-12, this important contribution to literacy education research and classroom practice offers a new perspective: a set of principled practices and case studies of excellent teaching. The case studies illustrate teaching and learning argumentative writing as the construction of knowledge and new understandings about experiences, ideas, and texts. Six themes key to teaching argumentative writing as a thoughtful, multi-leveled practice for deep learning and expression are presented: teaching and learning argumentative writing as social practice; teachers' epistemological beliefs about argumentative writing; variations in instructional chains; instructional conversations in support of argumentative writing as deep learning and appreciation of multiple perspectives; contextualized analysis of argumentative writing; and the teaching and learning of argumentative writing and the construction of rationalities. **Practical Argument** Laurie G. Kirsznner, Stephen R.

Mandell, 2011-05-16 From the best-selling authors of the most successful reader in America comes *Practical Argument*. No one writes for the introductory composition student like Kirsznner and Mandell, and *Practical Argument* simplifies the study of argument. A straightforward, full-color, accessible introduction to argumentative writing, it employs an exercise-driven, thematically focused, step-by-step approach to get to the heart of what students need to understand argument. In clear, concise, no-nonsense language, *Practical Argument* focuses on basic principles of classical argument and introduces alternative methods of argumentation. *Practical Argument* forgoes the technical terminology that confuses students and instead explains concepts in understandable, everyday language, illustrating them with examples that are immediately relevant to students' lives. **The St. Martin's Guide to Writing** Rise B. Axelrod, Charles R. Cooper, 2010-01-26 This

textbook provides instruction in college-level rhetoric and writing. It offers readings, a research manual, a handbook, and supports a range of approaches to teaching and learning, including collaboration, visual rhetoric, personal writing, writing about literature, writing in the community, and the workplace. Field research, portfolios, oral presentations, essay exams, and ESL. It contains step-by-step guides to writing specific kinds of essays: remembering events, writing profiles, explaining a concept, finding common ground, arguing a position, proposing a solution, justifying an evaluation, speculating about causes, and interpreting stories. Because so much college writing requires strong argumentation skills, four of the assignment chapters focus on argumentative writing, and a separate strategies chapter covers theses, reasons, and support, counterarguments, and logical fallacies. Three full chapters on research give students useful strategies not only for conducting field, library, and Internet research but also for evaluating sources, deciding whether to quote, paraphrase, or summarize, avoiding plagiarism, and documenting sources. The authors have included 39 readings by well-known authors and various fresh voices, including 12 students providing well-written examples of the different types of essays and papers that students might be asked to complete. **The Longman Handbook for Writers and Readers with MLA Updates** Christopher M.
