Sample Service Evaluation Questionnaire:

Evaluating Teen Services and Programs Sarah Flowers, 2012-05-31 Flowers offers guidance for librarians in examining all aspects of teen programming and services to determine where improvement is needed. Readers will learn how to develop goals and objectives for evaluation, collect the data for a realistic picture of a library's strengths and weaknesses, use many different types of data with the help of practical examples included in the text, evaluate YA collections, summer reading programs, special events, and library staff. This guide comes with an explanation of the YALSA competencies, the YALSA teen services evaluation tool, and models for what excellent teen services programs should look like. Ready to use evaluation forms and checklists save time and resources by improving assessment methods in minutes. Principles of Assessment and Outcome Measurement for Occupational Therapists and Physiotherapists Alison Laver Fawcett, 2013-03-15 This textbook on assessment and outcome measurement is written for both occupational therapy and physiotherapy students and qualified therapists. It begins by defining what is meant by assessment, outcome evaluation, and measurement, and discussing the complexity of therapy assessment and measurement, including the challenge of measuring human behaviour and the impact of factors such as task demand and context, including the environment. Methods of data collection, e.g., observation, interview, standardised testing, and sources, e.g., self-report, proxy, for collecting information about clients are then reviewed, and the main purposes of assessment, e.g., descriptive, evaluative, predictive, discriminative, are presented. The book then addresses the topics of standardisation, levels of measurement, reliability, validity, and clinical utility. There is a chapter describing and applying models for categorizing levels of function to aid assessment and measurement. The concept of clinical reasoning and reflective practice is then explored. Application of principles is supported through detailed case studies and worksheets, and the criteria for test critique and guidelines for choosing a particular assessment approach are discussed.

College Information Literacy Efforts Benchmarks, 2008 College Information Literacy Efforts Benchmarks presents the results of an information literacy higher education benchmarking study. More than 110 colleges from the United States and Canada participated in the study; data is broken out by size and type of college, for public and private colleges, for US and Canadian colleges, and even by number of in-class instructional sessions given. Uniquely, this report also breaks out data separately at institutions at which librarians have faculty status and at which they do not.
