Housing for the Millions Koos Bosma,Dorine van Hoogstraten,Martijn Vos,2000 Home represents a fundamental value in a person's life Although many factors pertaining to his housing situation are beyond the occupant's control he still attempts to create his own domestic domain the finite center of a world in which he is free to be himself As long ago as 1961 in his book *Supports* An alternative to mass housing John Habraken suggested a completely different approach to mass housing in the Netherlands In an effort to offer the occupant of a mass produced dwelling the opportunity to make a personal statement he introduced the concept of a separation of support and infill Habraken sees the support structure as the aspect

of housing production that represents communal responsibility and the infill as the aspect that stands for individual control He formulated the support and infill concept to introduce variation and personal authority into millions of dwellings This alternative was to be put into practice by the Foundation for Architects Research SAR which made Habraken its first director The ambition of the SAR to radically change the production methods of mass housing led to concepts and rules of play that had repercussions on the entire building cycle from architectural design to product development All the achievements disappointments successes and failures involved in the realization of an alternative to traditional housing construction can be discovered in this book This is the first time that the intellectual heritage of the SAR has been brought together in book form and considered within a broader international perspective Bookjacket **The Brewery, Flour, Cereal, Malt, Yeast, Soft Drink, and Distillery Worker**,1962 *Earthbond*,1975 *The Woman Teacher*,1921 **Resources in Education**
