**Rethinking Sustainable Development** Seck TAN, 2024-06-03. This book demonstrates falsified economic performance of global economies when the environment is not recognised as a capital and when the ecosystem is overlooked towards sustainable development. Seck begins with an analysis of standard macroeconomic framework and policy practice. He argues with reference to environmental accounting literature that environmental capital must form an integral component of economic measurement. This paves the way for an alternative environmental macroeconomics framework for policy analysis that promotes sustainable development. The book demonstrates how environmental capital can be measured with reference to select OECD countries and provides a methodology for analysing how macroeconomic goals are related to a steady state economy. Seck then concludes with a summary of the conflict between current economic growth and ecosystem preservation and outlines possible policy improvements and directions for research. *Rethinking Sustainable Development* is an invaluable reference for policymakers as well as researchers and students of environmental economics, sustainable development, and macroeconomics.

**Ecolinguistics** Arran Stibbe, 2015-05-01. Bringing together the latest ecolinguistic studies

with new theoretical insights and practical analyses this book charts a new course for ecolinguistics as an engaged form of critical enquiry Featuring A framework for understanding the theory of ecolinguistics and applying it practically in real life Exploration of diverse topics from consumerism in lifestyle magazines to Japanese nature haiku A comprehensive glossary giving concise descriptions of the linguistic terms used in the book Discourse analysis of a wide range of texts including newspapers magazines advertisements films nonfiction books and visual images This is essential reading for undergraduates postgraduates and researchers working in the areas of Discourse Analysis and Language and Ecology
