registration fee to take the SAT II Math Level IIC Consult the publication Taking the SAT II Subject Tests for information on the fee structure Financial assistance may be granted in certain situations To find out if you qualify and to register for assistance contact your academic advisor What Kind of Calculator Can I Use If at all possible bring a graphing calculator on test day The test assumes that most students use a graphing calculator and having one at your side may give you an edge Consult official ETS and College Board publications including Collegeboard.com for more specifics No pocket organizers hand held minicomputers paper tape or noisy calculators may be used In addition no calculator requiring an external power source will be allowed and calculators may not be shared you must bring your own Thoroughly acquaint yourself with the operation of your calculator Your performance could suffer if say you spend too much time searching for the correct function or fail to keep in mind that the test's answer choices are rounded or forget to switch to the correct calculating mode HOW TO USE THIS BOOK What Do I Study First Remember that the SAT II Math Level IIC Subject Test is designed to test knowledge that has been acquired throughout your education the key to solid preparation is to thoroughly review the subject matter Refresh yourself by studying our review material and taking the sample tests provided in this book Our practice tests will expose you to the types of questions directions and format that are characteristic of the SAT II Math Level IIC Subject Test To begin your studies go over our course review and suggestions for test taking Then take Practice Test 1 using it as a diagnostic to reveal your areas of weakness Now you'll want to restudy the review material focusing on your specific problem areas The course review includes the information you need to know for the exam Take the remaining practice tests to further test yourself on the material and build your confidence by fully acquainting yourself with the test format When Should I Start Studying It is never too early to start studying for the SAT II Math Level IIC test The earlier you begin the more time you will have to sharpen your skills Do not procrastinate Cramming is not an effective way to study since it does not allow you the time needed to learn the test material The sooner you learn the format of the exam the more comfortable you will be when you take the exam FORMAT OF THE SAT II MATH LEVEL IIC The SAT II Math Level IIC is a one hour exam consisting of 50 multiple choice questions Each question has five possible answer choices lettered A through E What's on the Test Here's the approximate distribution of topics covered on the exam Topic Percentage of Test Number of Questions Algebra 18% 9 questions Geometry 20% 10 questions Three dimensional Geometry 8% 4 questions Coordinate Geometry 12% 6 questions Trigonometry 20% 10 questions Functions 24% 12 questions Statistics Probability 6% 3 questions Miscellaneous 12% 6 questions includes logic and proof elementary number theory sequences and limits Questions on the test are also grouped according to whether or not you need to use your calculator Category Definition Approximate Percentage of Questions STUDYING FOR THE SAT II MATH LEVEL IIC It is very important to choose the time and place for studying that works best for you Some students may set aside a certain number of hours every morning to study while others may choose to study at night before going to sleep Other students may study during the day while waiting on line or even

while eating lunch Only you can determine when and where your study time will be most effective Be consistent and use your time wisely Work out a study routine and stick to it When you take the practice tests try to make your testing conditions as much like the actual test as possible Turn your television and radio off and sit down at a quiet desk or table free from distraction Make sure to clock yourself with a timer As you complete each practice test score it and thoroughly review the explanations to the questions you answered incorrectly however do not review too much at any one time Concentrate on one problem area at a time by reviewing the questions and explanations and by studying our review until you are confident you completely understand the material Keep track of your scores By doing so you will be able to gauge your progress and discover general weaknesses in particular sections You should carefully study the reviews that cover your areas of difficulty as this will build your skills in those areas TEST TAKING TIPS Although you may be unfamiliar with standardized tests such as the SAT II Math Level IIC Subject Test there are many ways to acquaint yourself with this type of examination and help alleviate your test taking anxieties Become comfortable with the format of the exam When you are practicing to take the SAT II Math Level IIC Subject Test simulate the conditions under which you will be taking the actual test Stay calm and pace yourself After simulating the test only a couple of times you will boost your chances of doing well and you will be able to sit down for the actual exam with much more confidence Know the directions and format for each section of the test Familiarizing yourself with the directions and format of the exam will not only save you time but will also ensure that you are familiar enough with the SAT II Math Level IIC Subject Test to avoid nervousness and the mistakes caused by being nervous Do your scratchwork in the margins of the test booklet You will not be given scrap paper during the exam and you may not perform scratchwork on your answer sheet Space is provided in your test booklet to do any necessary work or draw diagrams If you are unsure of an answer guess However if you do guess guess wisely Use the process of elimination by going through each answer to a question and ruling out as many of the answer choices as possible By eliminating three answer choices you give yourself a 50 50 chance of answering correctly since there will only be two choices left from which to make your guess Mark your answers in the appropriate spaces on the answer sheet Each numbered row will contain five ovals corresponding to each answer choice for that question Fill in the oval that corresponds to your answer darkly completely and neatly You can change your answer but remember to completely erase your old answer Any stray lines or unnecessary marks may cause the machine to score your answer incorrectly When you have finished working on a section you may want to go back and check to make sure your answers correspond to the correct questions Marking one answer in the wrong space will throw off the rest of your test whether it is graded by machine or by hand You don t have to answer every question You are not penalized if you do not answer every question The only penalty results from answering a question incorrectly Try to use the guessing strategy but if you are truly stumped by a question remember that you do not have to answer it Work quickly and steadily You have a limited amount of time to work on each section so you need to work quickly and steadily Avoid focusing on one

problem for too long Before the Test Make sure you know where your test center is well in advance of your test day so you do not get lost on the day of the test On the night before the test gather together the materials you will need the next day Your admission ticket Two forms of identification e g driver s license student identification card or current alien registration card Two No 2 pencils with erasers Directions to the test center A watch if you wish but not one that makes noise as it may disturb other test takers On the day of the test you should wake up early after a good night s rest and have breakfast Dress comfortably so that you are not distracted by being too hot or too cold while taking the test Also plan to arrive at the test center early This will allow you to collect your thoughts and relax before the test and will also spare you the stress of being late If you arrive after the test begins you will not be admitted to the test center and you will not receive a refund During the Test When you arrive at the test center try to find a seat where you feel most comfortable Follow all the rules and instructions given by the test supervisor If you do not you risk being dismissed from the test and having your scores canceled Once all the test materials are passed out the test instructor will give you directions for filling out your answer sheet Fill this sheet out carefully since this information will appear on your score report After the Test When you have completed the SAT II Math Level IIC Subject Test you may hand in your test materials and leave Then go home and relax When Will I Receive My Score Report and What Will It Look Like You should receive your score report about five weeks after you take the test This report will include your scores percentile ranks and interpretive information *SAT Subject Test Math Level 2 Prep Book* ,2020-04-17 Test Prep Books SAT Subject Test Math Level 2 Prep Book SAT Math 2 Subject Test Study Guide and Practice Questions for the College Board Exam 3rd Edition Made by Test Prep Books experts for test takers trying to achieve a great score on the SAT Math Level 2 exam This comprehensive study guide includes Quick Overview Find out what s inside this guide Test Taking Strategies Learn the best tips to help overcome your exam Introduction Get a thorough breakdown of what the test is and what s on it Number and Operations Geometry and Measurement Data Analysis Statistics and Probability Practice Questions Practice makes perfect Detailed Answer Explanations Figure out where you went wrong and how to improve Disclaimer SAT R is a trademark registered by the College Board which is not affiliated with and does not endorse this product Studying can be hard We get it That s why we created this guide with these great features and benefits Comprehensive Review Each section of the test has a comprehensive review created by Test Prep Books that goes into detail to cover all of the content likely to appear on the test Practice Test Questions We want to give you the best practice you can find That s why the Test Prep Books practice questions are as close as you can get to the actual SAT Math Level 2 test Answer Explanations Every single problem is followed by an answer explanation We know it s frustrating to miss a question and not understand why The answer explanations will help you learn from your mistakes That way you can avoid missing it again in the future Test Taking Strategies A test taker has to understand the material that is being covered and be familiar with the latest test taking strategies These strategies are necessary to properly use the time provided They also help test

Guide Bobby Ondago,2015-07-30 The creation of this book resulted from over ten years of experience working with numerous students on the SAT Math Level 2 Subject test Having used numerous texts and resources to prepare students for the test I was well aware of the shortcomings that each source exhibited I always had to rely on 2 3 books at a time to ensure that my students were well prepared There was no single source that provided a complete and in depth study guide to prepare for the test My goal was therefore to create a comprehensive study guide that covered all the topics being tested The materials in this book are well organized and aim to provide students with an easy to follow study guide that will enable them to gauge their progress as they move from one unit to the next The first chapter contains critical strategies that each student needs to master in order to outperform his her own expectations The rest of the topics are divided into 9 chapters that include basic concepts formulas and examples At the end of each chapter is a chapter review that contains a lot of practice problems necessary to test your understanding of the concepts learned It is my belief that practice makes perfect and through hard work dedication and rigor every student can be successful Having attended Stanford University and worked with numerous students in college admissions counseling I know how competitive the college admissions process has become Students need to garner every inch of advantage to distinguish themselves from the rest of the application pool The SAT Subject Tests provide such an avenue Although most colleges do not require subject tests subject tests are usually highly recommended It is my greatest hope that this book will provide a great resource to each student studying for the Math Level 2 test I would welcome any comments suggestions or questions you may have via email to ondago gmail com In addition please feel free to email me with regards to any errors you may encounter while using the book Your feedback will be highly valuable in updating and the completion of any future editions of this book [The SAT Subject Test - Math](#) ,2005-07 Get SAT Street Smart Our savvy exam experts show you how to master the test and score higher This newly revised 7th edition contains the latest information on the new SAT Subject Test for Math Level 2 The study guide comes complete with an in depth review of algebra solid geometry trigonometry and more Build your test taking skills with 6 full length practice exams Study smarter with detailed answers to every practice question Each question is explained in an easy to understand format Follow up your study with REA s test taking strategies powerhouse drills and schedule guidelines that get you ready for test day DETAILS New updated 7th edition comes complete all the latest SAT information 6 full length practice exams Concentrated subject reviews that hone test skills max study efforts Thoroughly detailed explanations for all practice exam
