Bihar and Mithila J. Albert Rorabacher, 2016-09-13 The struggling states of Bihar and Mithila serve as extreme examples of India's problems. Development here has been thwarted by a hereditary landed aristocracy supported by religion, casteism, custom, social stratification, tradition, and patterns of behaviour that can be traced back millennia. In turn, all these have been masterfully manipulated by co-opted politicians who have turned politics into a veritable art form, as this volume comprehensively demonstrates. Please note: Taylor Francis does not sell or distribute the Hardback in India, Pakistan, Afghanistan, Nepal, Bhutan, Bangladesh, and Sri Lanka.

From The Vault of Schrodinger's Cat Natasha Parkinson, 2023-08-02 Schrodinger's Cat was a science blog set out to debunk the science misinformation that was and is rampant on social media, as well as be a credible and trusted source to answer all of readers' science questions such as: What makes fireworks different colours? How do birds find their way when migrating? What is a GMO? Is it possible to recreate Frankenstein's Monster? What causes that Thanksgiving day turkey coma? What is healthier: Eating meat or being vegan? Is green energy more efficient, and how much would a city need to power itself? Can sunscreen really give you cancer? How far away are we from having a zoo full of extinct animals? Is the science and technology in my favourite movie/video game even possible? Did they actually find water on Mars? Why are the InSight and Parker Solar Probe missions so important? All of this and more are answered in *From The Vault of Schrodinger's Cat*, a collection of readers' favourite posts from the beloved blog Schrodinger's Cat, including footnotes of updates of how the science has progressed since the post was released, and extensive works cited and resources to provide the same level of transparency, dedication to fact checking, and search for knowledge that the readers of Schrodinger's Cat have come to know.

Advances in Engineering Education in the Middle East and North Africa Mahmoud Abdulwahed, Mazen O. Hasna, Jeffrey E. Froyd, 2015-11-18 This book provides a collection of the latest advances in engineering education in the Middle East and North Africa (MENA) region and sheds insights for future development. It is one of the first books to address the lack of comprehensive literature on undergraduate engineering curricula and stimulates intellectual and critical discourse on the next wave of engineering innovation and education in the MENA region. The authors look at recent innovations through the lens of four topics: learning and teaching, curriculum development, assessment and accreditation, and challenges and sustainability. They also include analyses of pedagogical innovations, models for transforming engineering education, and methods for using technological innovations to enhance active learning. Engineering education topics on issues such as construction, health and safety, urban design, and environmental engineering in the context of the MENA region are covered in further detail. The book concludes with practical recommendations for implementations in engineering education. This is an ideal book for engineering education academics, engineering curriculum developers, and accreditation specialists, and deans and leaders in engineering education.
