Strategic Decisions in Directed Networks Amnon Rapoport, Eyran J. Gisches, Vincent Mak, 2022-03-09 This book collects and integrates the results of an extensive research program conducted by the authors over the past two decades It spans the disciplines of transportation science operations management and behavioral economics and consists of 16 chapters previously published in peer reviewed academic journals and grouped under three topical sections queueing route choice and departure time The book focuses on strategic interactions in directed networks and laboratory experiments carefully designed to test the descriptive validity of the underlying theoretical models The research question that unifies the chapters is do the conclusions of theoretical literature account for the decisions of network users in controlled laboratory experiments With several major qualifications this book answers this question affirmatively

**Evolution of Black Holes in Anti-de Sitter Spacetime and the Firewall Controversy** Yen Chin Ong, 2015-11-27 This thesis focuses on the recent firewall controversy surrounding evaporating black holes and shows that in the best understood example concerning electrically charged black holes with a flat event horizon in anti de Sitter AdS spacetime the firewall does not arise The firewall which surrounds a sufficiently old black hole threatens to develop into a huge crisis since it could occur even when spacetime curvature is small which contradicts general relativity However the end state for asymptotically flat black holes is ill understood since their curvature becomes unbounded This issue is avoided by working with flat charged black holes in AdS The presence of electrical charge is crucial since black holes inevitably pick up charges throughout their long lifetime These black holes always evolve toward extremal limit and are then destroyed by quantum gravitational effects This happens sooner than the time required to decode Hawking radiation so that the firewall never sets in as conjectured by Harlow and Hayden Motivated by the information loss paradox the author also investigates the possibility that monster configurations might exist with an arbitrarily large interior

bounded by a finite surface area Investigating such an object in AdS shows that in the best understood case such an object much like a firewall cannot exist

**Avengers Infinity Saga and Philosophy** Robert Arp, Heather L. Rivera, 2020-06-09 In Avengers Infinity Saga and Philosophy philosophers explore the momentous issues and the fascinating puzzles raised by Marvel's compelling series of movies Is the Thanos snap truly an answer to overpopulation and famine or is it simply indefensible mass murder on a cosmic scale Are the Avengers who try to stop Thanos dishing out justice or merely fighting a man who is himself just Captain America or Tony Stark which leader holds the key to a civilized society Dr Strange claims to see 14 000 605 possible futures in one of which Thanos is defeated What does this tell us about the true nature of reality Sometimes your best just isn't enough How can we cope with inevitability How can the Soul Stone and the Binding of Isaac by Abraham help us understand the Infinity War saga Is Thanos a utilitarian And if so is his utilitarian calculus logically sound Would it be possible for a group like the Avengers to amass enormous power to fight for humankind without themselves becoming a corrupt ruling class Can the past Nebula shooting the future Nebula cause her to cease to exist Can you change the future by communicating with yourself or your family in the past Can Thanos be seen as the epitome of non self serving behavior or is Thanos masking his own egoism with the lie that his altruistic mission is to bring the universe into balance Does Thanos show us the danger of living by an absolute moral compass which allows us to see only what we believe to be the right with no variations or nuances

**Contact with Alien Civilizations** Michael Michaud, 2010-05-05 The proper study of mankind is not merely Man but Intelligence 1 Arthur C Clarke 1951 In the long running television series The X Files the original Deep Throat said to FBI Special Agent Mulder that there are those like yourself who believe in the existence of extraterrestrial life Ah but that's not the question If extraterrestrial life exists most of it may be in simpler forms comparable to the one celled organisms of Earth biology Finding such life would be fascinating for scientists but may be of only passing interest to the general public What intrigues the average citizen is the possibility of contact with extraterrestrial intelligence We want to communicate with other sentient beings learning what they know and telling them about ourselves We want to find out how they are like us and how they are different Microorganisms don't have a lot to say There is another implication of contact that underlies this book Intelligent extraterrestrials might have an impact on our future The information they send us if any might change our cultures They could have conscious intentions toward us and possibly the technologies to reach us directly Their intentions may be benign or not Our interest in alien minds is not new The idea that intelligent beings exist beyond the Earth has been part of the Western intellectual tradition for more than 2000 years Sometimes this belief was widespread at other times it was out of fashion
