**The Dystopian Imagination in Contemporary Spanish Literature and Film** Diana Q. Palardy,2018-07-27 This study examines contemporary Spanish dystopian literature and films in directly related to the 2008 financial crisis from an urban cultural studies perspective. It explores culturally charged landscapes that effectively convey the zeitgeist and reveal deep rooted anxieties about issues such as globalization, consumerism, immigration, speculation, precarity, and political resistance, particularly by Indignados, Indignant Ones from the 15 M Movement. The book loosely traces the trajectory of the crisis with the first part looking at texts that underscore some of the behaviors that indirectly contributed to the crisis and the remaining chapters focusing on works that directly examine the crisis and its aftermath. This close reading of texts and films by Ray Loriga, Elia Barceló, Ion de Sosa, José Ardillo, David Llorente, Eduardo Vaquerizo, and Ricardo Menéndez Salmón offers insights into the creative ways that these authors and directors use spatial constructions to capture the dystopian imagination.

A Climate Modelling Primer, Fourth Edition is designed to explain the basis and mechanisms of all types of current physically based climate models. A thoroughly revised and updated edition, this book will assist the reader in understanding the complexities and applicabilities of today's wide range of climate models. Topics covered include the latest techniques for modelling the coupled biosphere-ocean-atmosphere system, information on current practical aspects of climate modelling and ways to evaluate and exploit the results, discussion of Earth System Models of Intermediate Complexity (EMICs) and interactive exercises based on Energy Balance Model (EBM) and the Daisyworld model. Source codes and results from a range of model types allows readers to make their own climate simulations and to view the results of the latest high resolution models. Now in full colour throughout and with the addition of cartoons to enhance student understanding, the new edition of this successful textbook enables the student to tackle the difficult subject of climate modeling.

The Cyborg Caribbean Samuel Ginsburg, 2023-08-11 The Cyborg Caribbean examines a wide range of twenty-first-century Cuban, Dominican, and Puerto Rican science fiction texts, arguing that authors from Pedro Cabiya, Alexandra Pagan Velez, and Vagabond Beaumont to Yasmin, Silvia Portales, Erick Mota, and Yoss, Haris, Durrani, and Rita Indiana Hernandez, among others, negotiate rhetorical legacies of historical technologocial colonialism and technologocial authoritarianism. The authors span the Hispanic Caribbean and their respective diasporas, reflecting how science fiction as a

genre has the ability to manipulate political borders As both a literary and historical study the book traces four different technologies electroconvulsive therapy nuclear weapons space exploration and digital avatars that have transformed understandings of corporality and humanity in the Caribbean By recognizing the ways that increased technology may amplify the marginalization of bodies based on race gender sexuality and other factors the science fiction texts studied in this book challenge oppressive narratives that link technological and sociopolitical progress
