Native Games Chris Hallinan, Barry Judd, 2013-07-19 Research on Indigenous participation in sport offers many opportunities to better understand the political issues of equality empowerment self determination and protection of culture and identity This volume compares and conceptualises the sociological significance of Indigenous sports in different international contexts Exploring the Northern Rocky Mountains Colin Arthur Shaw, Basil Tikoff, 2014-05-01 The field trips in this guidebook are associated with the GSA Rocky Mountain Cordilleran Joint Section Meeting which will take place in Bozeman Montana in May 2014 Accessions of Unlimited Distribution Reports , 1972-08-18 Disorder and the Disinformation Society Jonathan Paul Marshall, James Goodman, Didar Zowghi, Francesca da Rimini, 2015-04-17 This book is the first general social analysis that seriously considers the daily experience of information disruption and software failure within contemporary Western society Through an investigation of informationalism defined as a contemporary form of capitalism it describes the social processes producing informational disorder While most social theory sees disorder as secondary pathological or uninteresting this book takes disordering processes as central to social life The book engages with theories of information society which privilege information order offering a strong counterpoint centred on disinformation Disorder and the Disinformation Society offers a practical agenda arguing that difficulties in producing software are both inherent to the process of developing software and in the social dynamics of informationalism It outlines the dynamics of software failure as they impinge on of information workers and on daily life explores why computerized finance has become inherently self disruptive asks how digital enclosure and intellectual property create conflicts over cultural creativity and disrupt informational accuracy and scholarship and reveals how social media can extend but also distort the development of social movements **Chasing Zero** Kat Janowicz, 2023-06-13 Kat Janowicz digs deep to chronicle the transformation of the LA Long Beach ports as a springboard for exploring the larger quest for an emission free world The landmark 2002 ruling in a lawsuit against the Port of Los Angeles and one of its terminal operators sent shock waves through global supply chains To stay in business and continue to compete on the world stage the LA and Long Beach ports had to start listening to the community and find common ground for reducing port related air pollution Ultimately the ports underwent nothing short of an environmental reformation Technical documents legislative records and news reports offer bits and pieces of this story but the full account has never been told until now Drawing on more than two decades of experience in the energy transportation and technology sectors Kat Janowicz digs deep to chronicle the transformation of the LA Long Beach ports as a springboard for exploring the larger quest for an emission free world the choices the costs and the challenges Janowicz reviewed thousands of documents watched hundreds of hours of video recordings and spoke to more than 150 people to tell this story and decode its complexities Those who shared their knowledge insights and personal stories include current and former port executives and staff elected and appointed officials private industry leaders scientists educators and everyday

people who live and work in Southern California Captivating informative and entertaining Chasing Zero is a primer for everyone from ordinary people to high level decision makers seeking to better understand the global trade supply chain technology energy and environmental issues and policies that affect us all While painting a vivid portrait of the global challenges we face the book sheds light on the exciting opportunities for current and future generations willing to tackle them

A Review of the Landscape Conservation Cooperatives National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Agriculture and Natural Resources, Board on Atmospheric Sciences and Climate, Committee on the Evaluation of the Landscape Conservation Cooperatives, 2016-11-28 The United States tradition of conserving fish wildlife habitats and cultural resources dates to the mid 19th century States have long sought to manage fish and wildlife species within their borders whereas many early federal conservation efforts focused on setting aside specific places as parks sanctuaries or reserves With advances in landscape ecology over the past quarter century conservation planners scientists and practitioners began to stress the importance of conservation efforts at the scale of landscapes and seascapes These larger areas were thought to harbor relatively large numbers of species that are likely to maintain population viability and sustain ecological processes and natural disturbance regimes often considered critical factors in conserving biodiversity By focusing conservation efforts at the level of whole ecosystems and landscape practitioners can better attempt to conserve the vast majority of species in a particular ecosystem Successfully addressing the large scale interlinked problems associated with landscape degradation will necessitate a planning process that bridges different scientific disciplines and across sectors as well as an understanding of complexity uncertainty and the local context of conservation work The landscape approach aims to develop shared conservation priorities across jurisdictions and across many resources to create a single collaborative conservation effort that can meet stakeholder needs Conservation of habitats species ecosystem services and cultural resources in the face of multiple stressors requires governance structures that can bridge the geographic and jurisdictional boundaries of the complex socio ecological systems in which landscape level conservation occurs The Landscape Conservation Cooperatives LCC Network was established to complement and add value to the many ongoing state tribal federal and nongovernmental efforts to address the challenge of conserving species habitats ecosystem services and cultural resources in the face of large scale and long term threats including climate change A Review of the Landscape Conservation Cooperatives evaluates the purpose goals and scientific merits of the LCC program within the context of similar programs and whether the program has resulted in measurable improvements in the health of fish wildlife and their habitats
