May it inspire future researchers educators and policymakers to contribute meaningfully to the field of education and to the betterment of society at large.

Khritish Swargiary The Essence of Research Methodology Jan Jonker, Bartjan Pennink, 2010-03-10

Methodology is the eld which is indisputably complex. In the academic world it is often said to be important yet in everyday academic practice it is not always treated accordingly. In teaching methodology is often a mandatory course. Usually it consists of learning how to adopt several common approaches when doing research and how to conceive a research design often leading to a survey. This usually leads to collecting data on a modest scale and when the opportunity arises analysing the data with the help of some statistics. Ask the students of their opinion at the end of such a course and they tend to heave a deep sigh of relief and say I have got through it. Then their real courses start again in which methodology often does not play a role at all. We are of the opinion that writing off methodology in this way is a real pity. It ignores the valuable role that methodology should play in academic teaching as a whole. Here methodology is presented as a form of thinking and acting that while obviously entailing research work can also include the design and change of organisations. This broad approach has been purposefully chosen as it is almost obvious from research and graduation projects that the students do not really have a clue what methodology involves and therefore wasting their time by producing work that has a little quality.

Research Methods Carrie A. Picardi, Kevin D. Masick, 2013-10-09

Research Methods Designing and Conducting Research with a Real World Focus provides the tools required to conduct relevant high quality research in both the classroom and the field. Carrie A Picardi and Kevin D Masick psychologists with expertise in both teaching research methods and applying methods to diverse field settings offer a unique perspective by integrating current research articles with field specific scenarios. They draw from research methodology tactics strategy and constraints from practitioners across the social sciences and in business. This text effectively bridges the gap between theory and practice by demonstrating how research is done within an organizational setting and supplies students with relevant applicable examples to learn from.
