## Novel Study Generic Questions:

**Underground to Canada (Novel Study) Gr. 4-7** Rob Kennedy, 1997-01-01 Underground to Canada is the historical story of freedom and survival told through the eyes of two young girls. The story surrounds Julilly and Liza who with their friends Lester and Adam escape from a life of slavery on a cotton plantation in the Deep South. The story follows the two young girls as they travel through the United States along the underground railway to reach their final destination Canada. During their journey the two girls get separated from their friends and must make the long treacherous journey alone. They are encountered with many obstacles but are helped throughout their journey by those who make up the underground railway. This Novel Study provides a teacher and student section with a variety of activities, discussion questions, and answer key to create a well rounded lesson plan.

[A Practical Guide to Teaching Research Methods in Education](#) Aimee LaPointe Terosky, Vicki L. Baker, Jeffrey C. Sun, 2023-03-23 A Practical Guide to Teaching Research Methods in Education brings together more than 60 faculty experts. The contributors share detailed lesson plans about selected research concepts or skills in education and related disciplines as well as discussions of the intellectual preparation needed to effectively teach the lesson. Grounded in the wisdom of practice from exemplary and award winning faculty from diverse institution types, career stages and demographic backgrounds this book draws on both the practical and cognitive elements of teaching educational and related research to students in higher education today. The book is divided into eight sections covering the following key elements within education and related research problems and research questions: literature reviews and theoretical frameworks, research design, quantitative methods, qualitative methods, mixed methods, findings and discussions, and special topics such as student identity development, community and policy engaged research, and research dissemination. Within each section individual chapters specifically focus on skills and perspectives needed to navigate the complexities of educational research. The concluding chapter reflects on how teachers of research also need to be learners of research as faculty continuously strive for mastery, identity and creativity in how they guide our next generation of knowledge producers through the research process. Undergraduate and graduate professors of education and related research courses, dissertation chairs, committee members, faculty development staff members and graduate students would all
