November 2013 Lifescience Memo:

Risk Regulation in the Internal Market Maria Weimer, 2019-03-13 This book offers a topical inquiry into the legal and political limits of EU regulation in the field of risk and new technologies surrounded by techno scientific complexity uncertainty and societal contestation It uses agricultural biotechnology as a paradigmatic example to illustrate the complex intertwinement between environmental public health economic and social concerns in risk regulation Weimer analyses the drawbacks of the EU approach to agricultural biotechnology showing that its reductionism i e the narrow understanding of GMO risks as well as the exclusion of broader societal concerns related to environmental and social sustainability has undermined both the legitimacy and effectiveness of EU regulation in this area Resistance to this approach however has also triggered legal innovations prompting us to re think EU internal market law including the way in which it manages the tensions between unity and diversity and between social and economic concerns This text offers fresh and original insights into how far the EU can go in harmonizing regulatory approaches to risk At the same time it proposes new ways of re thinking EU risk regulation to make it more responsive to different perspectives on risk and technology A unique feature of this book is that it contributes to various strains of scholarship including risk regulation internal market law public administration and studies of governance and regulation as well as connecting these themes to broader debates about the legitimacy of European integration and new ways of differentiated integration As a result it assists in re imagining the EU internal market and its regulation as a site of diversity

NASA Technical Memorandum ,1988 Kinship, State Formation and Governance in the Arab Gulf States Scott J. Weiner, 2022-04-04 Tribe state relations are a foundational element of authoritarian bargains in the Middle East particularly in the Gulf States However the structures of governance built upon that foundation exhibit wide differences What explains this variation in the salience of kinship authority Through a case comparison of Kuwait Oman and Qatar Scott Weiner shows that variation in tribal access to limited resources before state building can account for these differences Based on empirical data and over 50 interviews with former government officials tribal leaders civil society activists and students the book reveals important new details about state formation on the Arabian Peninsula

Global Transformations in the Life Sciences, 1945-1980 Patrick Manning, Mat Savelli, 2018-06-07 The second half of the twentieth century brought extraordinary transformations in knowledge and practice of the life sciences In an era of decolonization mass social welfare policies and the formation of new international institutions such as UNESCO and the WHO monumental advances were made in both theoretical and practical applications of the life sciences including the discovery of life s molecular processes and substantive improvements in global public health and medicine Combining perspectives from the history of science and world history this volume examines the impact of major world historical processes of the postwar period on the evolution of the life sciences Contributors consider the long term evolution of scientific practice research and innovation across a range of fields and subfields in the life sciences and in the context of Cold

War anxieties and ambitions Together they examine how the formation of international organizations and global research programs allowed for transnational exchange and cooperation but in a period rife with competition and nationalist interests which influenced dramatic changes in the field as the postcolonial world order unfolded **The elephant and the dragon in contemporary life sciences** Joy Y. Zhang,Saheli Datta Burton,2022-03-15 This book provides a powerful diagnosis of why the global governance of science struggles in the face of emerging powers Through unpacking critical events in China and India over the past twenty years it demonstrates that the subversiveness assumed in the two countries rise in the life sciences reflects many of the regulatory challenges that are shared worldwide It points to a decolonial imperative for science governance to be responsive and effective in a cosmopolitan world By highlighting epistemic injustice within contemporary science the book extends theories of decolonisation

A History of Scientific Journals Aileen Fyfe,Noah Moxham,Julie McDougall-Waters,Camilla Mørk Røstvik,2022-10-03 Modern scientific research has changed so much since Isaac Newton s day it is more professional collaborative and international with more complicated equipment and a more diverse community of researchers Yet the use of scientific journals to report share and store results is a thread that runs through the history of science from Newton s day to ours Scientific journals are now central to academic research and careers Their editorial and peer review processes act as a check on new claims and findings and researchers build their careers on the list of journal articles they have published The journal that reported Newton s optical experiments still exists First published in 1665 and now fully digital the Philosophical Transactions has carried papers by Charles Darwin Dorothy Hodgkin and Stephen Hawking It is now one of eleven journals published by the Royal Society of London Unrivalled insights from the Royal Society s comprehensive archives have enabled the authors to investigate more than 350 years of scientific journal publishing The editorial management business practices and financial difficulties of the Philosophical Transactions and its sibling Proceedings reveal the meaning and purpose of journals in a changing scientific community At a time when we are surrounded by calls to reform the academic publishing system it has never been more urgent that we understand its history

Life in Space Maura Phillips Mackowski,2022-05-24 This book explores the many aspects and outcomes of NASA s research in life sciences a little understood endeavor that has often been overlooked in histories of the space agency
