Agent Release Control Panel

NOTIFIER®
by Honeywell

Conventional Releasing Panels

General

The RP-2002 is a strobe-style IFACP (fire-alarm and dual hazard agent-releasing applications). The RP-2002 provides reliable fire detection, signalling and protection for commercial, industrial and institutional buildings requiring agent-based releasing. The RP-2002 is compatible with System Sensors® detectors (which are conventional smoke detectors that can indicate a maintenance trouble signal to the IFACP indicating the need for cleaning) and a supervisory "freeze" signal when the ambient temperature falls below the detector setting of approximately 40°F (-7.2°C). In addition, the control panel is compatible with conventional input devices such as two-wire smoke detectors, four-wire smoke detectors, pull stations, wallflow devices, tamper switches and other normally-open contact devices. Refer to the Notifier Device Compatibility Document for a complete listing of compatible devices.

Four outputs are preprogrammable via NACOs (Notification Application Circuits) or releasing circuits. These preprogrammable Form-C relays (factory programmed for Alarm, Trouble and Supervisory); and 24 VDC special application resettable and non-resettable power outputs are also included on the main circuit board. The RP-2002 supervises all wiring, AC voltage, battery charger and battery level.

Activation of a compatible smoke detector or any normally-open fire alarm indicating device will activate audible and visual signalling devices, illuminate an indicator, display alarm information on the panel's LCD, sound the panel's siren at the IFACP, activate the IFACP's alarm relay and operate an optional module used to notify a remote station or initiate an auxiliary control function.

The RP-2002(E) offers the same features as the RP-2002 but allows connection to 220/240 VAC. Unless otherwise specified, the information in this data sheet applies to both the 115/120 VAC and 220/240 VAC versions of the panel.
