Artificial Intelligence into ERP Software Siar Sarferaz,2024-05-30 This book explains how to embed artificial intelligence
 in digitized business processes of ERP software by solving the two related substantial challenges how can artificial
 intelligence be systematically integrated into ERP business processes for ease of consumption and how can artificial
 intelligence be made enterprise ready by covering ERP qualities like compliance lifecycle management extensibility or
 scalability As a general introduction the first part of this book takes the reader through a historical journey towards
 intelligent ERP systems In addition reference processes and a reference architecture for ERP systems are proposed which
 build the foundation for the suggested subsequent solution concept including a method for operationalizing intelligence for
 ERP business processes Subsequently in the second part detailed concepts of embedding artificial intelligence into ERP
 software are proposed In this context the suggested solution architecture is depicted and specific topics are resolved like
 data integration model validation explainability data protection and privacy model degradation and performance In the last
 part an implementation framework is suggested which enables the previously introduced concepts and harmonizes the
 development and operations of artificial intelligent ERP applications This part concludes with case studies considering
 artificial intelligence scenarios of SAP S 4HANA in the areas of logistics finance and sales which apply the defined solution
 approach and shows its real world feasibility This book is written for professionals who want to implement as developers or
 exploit as business analysts or consultants or consider plan the implementation exploitation as managers of artificial
 intelligence in business information systems *Bibliographic Guide to Conference Publications* New York Public Library.
