**Science Fiction in India** ,2022-05-30 Nominated 2023 Teaching Literature Book Award Indian Science Fiction has evolved over the years and can be seen making a mark for itself on the global scene Dalit speculative fiction writer and editor Mimi Mondal is the first SF writer from India to have been nominated for the prestigious Hugo award In fact Indian SF addresses themes such as global climate change Debates around G C C are not just limited to science fiction but also permeate in critical discussions on SF This volume seeks to examine the different ways by which Indian SF narratives construct possible national futures For this looking forward necessarily germinates from the current positional concerns of the nation While some work has been done on Indian SF there is still a perceptible lack of an academic rigor invested into the genre primarily perhaps because of not only its relative unpopularity in India but also its employment of futuristic sights Towards the same among other things it proposes to study the growth and evolution of science fiction in India as a literary genre which accommodates the duality of the national consciousness as it simultaneously gazes ahead towards the future and glances back at the past In other words the book will explore how the tensions generated by the seemingly conflicting forces of tradition and modernity within the Indian historical landscape are realized through characteristic tropes of SF storytelling It also intends to look at the interplay between the spatio temporal coordinates of the nation and the SF narratives produced within to see firstly how one bears upon the other and secondly how processes of governance find relational structures with such narratives Through these the volume wishes to interrogate how postcolonial futures promise to articulate a more representative and nuanced picture of a contemporary reality that is rooted in a distinct cultural and colonial past
