

Wireless IP | SMT-WS120

The Samsung Wireless IP solution lets you use mobile data devices including laptops and tablets as well as mobile Wi-Fi handsets on the same wireless network. Now you can stay in touch wherever you are, no longer tied to your desk waiting for that important call.

Wireless where you want it

Ideal for employees who are not always desk based, the Samsung Wireless IP solution allows you to be more in touch with your business, more responsive to customers and, if needed, your office calls can be more discrete. Samsung Wi-Fi access points expand the reach of your voice and data communication systems and are used in conjunction with the award winning OfficeServ system. The Samsung Wireless IP handsets are fully integrated extensions of the host system and deliver all of the features and functionality your business requires.

Samsung Wireless IP Handset SMT-WS120

These stylish business handsets deliver the full range of OfficeServ features using the same user interface available with the Samsung SMT 3100 and 5200 series IP handsets. In addition, they also provide functionality normally

associated with a mobile phone, with a large screen, internal number memory, called number list, calendar function, campus mobility, stylish design and much more.

Voice and data on one network

Wireless IP networks are now a common feature in many business premises as they bring freedom for users to receive network connectivity without having to be close to a traditional network socket. Samsung understands that voice is a mission-critical application and that voice quality is a basic requirement. The OfficeServ Wireless IP delivers a no-compromise voice quality solution, sharing the network bandwidth with the organisation's data applications, but managing the bandwidth so that calls get the quality they require regardless of what other demands are placed on the network.

Key Benefits

- Ideal for non desk-based employees
- Provide all of the features and functionality of the OfficeServ as the solution is fully integrated with the system
- Provide mobile phone functionality including internal number memory and call log memory
- The Samsung Wireless IP solution uses the industry standard IEEE802.11a/b/g/n/ac for the air interface which allows users to connect any compatible data equipment to their network through the Samsung Access Point.
