Case Studies Alien Invasion Fiction:

Women Musicians in Victorian Fiction, 1860-1900 Phyllis Weliver, 2016-07-28 Over the first half of the nineteenth century writers like Austen and Bront confined their critiques to satirical portrayals of women musicians Later however a marked shift occurred with the introduction of musical female characters where were positively to be feared First published in 2000 this book examines the reasons for this shift in representations of female musicians in Victorian fiction from 1860 1900 Focusing on changing gender roles musical practices and the framing of both of these scientific discourses the book explores how fictional notions of female musicians diverged from actual trends in music making This book will be of interest to those studying nineteenth century literature and music Novel Ecosystems Richard J. Hobbs, Eric S. Higgs, Carol Hall, 2013-01-07 Land conversion climate change and species invasions are contributing to the widespread emergence of novel ecosystems which demand a shift in how we think about traditional approaches to conservation restoration and environmental management They are novel because they exist without historical precedents and are self sustaining Traditional approaches emphasizing native species and historical continuity are challenged by novel ecosystems that deliver critical ecosystem services or are simply immune to practical restorative efforts Some fear that by raising the issue of novel ecosystems we are simply paving the way for a more laissez faire attitude to conservation and restoration Regardless of the range of views and perceptions about novel ecosystems their existence is becoming ever more obvious and prevalent in today s rapidly changing world In this first comprehensive volume to look at the ecological social cultural ethical and policy dimensions of novel ecosystems the authors argue these altered systems are overdue for careful analysis and that we need to figure out how to intervene in them responsibly This book brings together researchers from a range of disciplines together with practitioners and policy makers to explore the questions surrounding novel ecosystems It includes chapters on key concepts and methodologies for deciding when and how to intervene in systems as well as a rich collection of case studies and perspective pieces It will be a valuable resource for researchers managers and policy makers interested in the question of how humanity manages and restores ecosystems in a rapidly changing world A companion website with additional resources is available at www.wiley.com/go/hobbs/ecosystems Writing and Responsibility Carl Tighe, 2005-07-12 In a world where literary scandals often end up in court the issue of responsibility in writing has never been more important In this groundbreaking study Carl Tighe asks the questions every writer needs to consider What is it that writers do Are they responsible for all the uses to which their writing might be put Or no more responsible than their readers How are a writer s responsibilities compromised or defined by commercial or political pressures or by notions of tradition or originality How does a writer s audience affect their responsibilities Are these the same for writers in all parts of the world under all political and social systems The first part of this book defines responsibility and looks at its relation to ideas such as power accuracy kitsch and political correctness The second part examines how particular writers have dealt with these issues through a series of often

controversial case studies including American Psycho Crash and The Tin Drum Writing and Responsibility encourages its readers to interrogate the choices they make as writers A fascinating look at the public consequences of the private act of writing Carl Tighe s book is a must read for everyone who writes or studies writing **UFOs and Abductions** David Michael Jacobs,2000 Examining the nature of UFO evidence the authors present a primer for scholars skeptics and others uneasy about investigating the field of UFOs The volume also brings together three bestselling authors David M Jacobs Budd Hopkins and Pulitzer Prize winner John Mack widely known for their writings on the controversial alien abduction phenomenon **Science-fiction Studies** ,2007 **Digital Immersive Art in China** Xinyang Zhao,2024-10-08 China has been stereotypically perceived as a place of backwardness However the 21st century has been a transitional period for China to express its cultural power This book explores how digital technology in particular virtual reality VR and augmented reality AR is playing a role in China s rejuvenation especially in relation to cultural displays performances and art exhibitions It examines how audiences both in China and globally respond to Digital China through digital immersive art Drawing on the author s anthropological research and empirical studies on stakeholders and audience reception this book provides a comprehensive understanding of transformative power of digital technology and its impact on cultural experience in contemporary China The reform of the cultural system over the past two decades in China has fostered a techno cultural imaginary mixed with the celebration of Chinese civilisation and advanced by digital technology and entrepreneurs Such a hybrid imaginary influences how people view and consume digital immersive art Much digital immersive art within China is thus viewed within the framework of modernisation as the case studies in this book will show Outside China however the dominant narrative of techno orientalism prevails constructing a different image of Digital China a technocratic state

Wells Meets Deleuze Michael Starr,2017-06-14 The writings of H G Wells have had a profound influence on literary and cinematic depictions of the present and the possible future and modern science fiction continues to be indebted to his scientific romances such as The Time Machine The War of the Worlds and The Island of Doctor Moreau Interpreted and adapted for more than a century Wells s texts have resisted easy categorization and are perennial subjects for emerging critical and theoretical perspectives The author examines Wells s works through the post structuralist philosophy of Gilles Deleuze Via this critical perspective concepts now synonymous with science fiction such as time travel alien invasion and transhumanism demonstrate the intrinsic relevance of Wells to the genre and contemporary thought **Dissertation**
