

## Structuring your policy brief

Here is the recommended structure for HSRC policy briefs; note that it differs radically from the structure of a journal article

Section	Description
Title	<p>The title should be short, catchy, and to the point.</p> <p><b>Short:</b> Try to keep it to less than 12 words. If that is not possible, consider breaking it into a title and subtitle.</p> <p><b>Catchy:</b> It should grab the reader's attention. Try to include relevant key words, or find an unusual turn of phrase that sticks in the mind. Also consider using a question as a title.</p> <p><b>To the point:</b> It should be relevant to the topic.</p> <p><b>EXAMPLES:</b></p> <ul style="list-style-type: none"> <li>Food security in protracted crises: What can be done?</li> <li>HIV, food security and nutrition</li> <li>Farmer field schools on land and water management: An extension approach that works</li> </ul>
Executive summary	<p>Ask yourself, 'What are the main points you want policymakers to get – even if they read nothing else?'</p> <p><b>EXAMPLE</b></p> <p>Soaring food prices pose problems for three groups. First, the poor whose ability to buy food is undermined. Second, governments of low-income countries facing higher import bills, soaring costs for safety net programmes and political unrest. Third, aid agencies juggling increased demands for food, cash and technical advice. High food prices threaten the gains made since the 1960s and highlight the long-term need for investment in, and better management of, the global food supply.</p> <p>This Policy Brief examines the causes of rising food prices, expected trends, the likely impact and possible policy responses.</p>
Introduction/statement of the aim of the policy brief	<p>Think of the introduction as the problem statement:</p> <ul style="list-style-type: none"> <li>The problem (What is the problem? Why is it important?)</li> <li>Background, context (What happens, where, who is involved?)</li> <li>Causes of current situation (Why? Give evidence or examples.)</li> <li>Effects of current situation (What effects does it have? Give evidence or examples.)</li> <li>The policy relevance of the problem/ current policy situation on the problem</li> <li>The aim of the policy brief</li> </ul>
Critique of the policy context/option	
The Study findings	<p>Here you describe the key aspects of the study/ies on which the policy brief is based. Make sure you structure the text in a <i>logical</i> manner. Do not force the reader to work to understand the logical flow. Some ways to do this:</p> <ul style="list-style-type: none"> <li>Keep the paragraphs short and restricted to a single idea. Consider putting this idea into a single phrase or sentence and printing it in <b>boldface</b> at the beginning of the paragraph.</li> <li>Use more headings and subheadings than you would do normally. In a four-page policy brief, you should have at least six subheadings – one for every two to four</li> </ul>

*Targeted Regulatory Writing Techniques: Clinical Documents for Drugs and Biologics* Linda Fossati Wood, MaryAnn Foote, 2009-01-05 This book describes the authors standard or best practices used in writing regulated clinical documents for the drug and biologics industry. The fundamental premise of this book is that the end documents submitted to a health authority is dependent on the beginning the planning and strategy that go into organizing written documentation. Each regulatory document inherently exists within a constellation of related documents. This book attempts to show the relationships between and among these documents and suggests strategies for organizing and writing these documents to maximize efficiency while developing clear and concise text. At all times and irrespective of applicable laws and guidelines good communication skills and a sense of balance are essential to adequately accurately and clearly describe a product's characteristics. At no time should the reader perceive these suggestions to be the only viable solution to writing regulatory documents nor should the reader expect that these suggestions guarantee product success. The audience for this book is the novice medical writer or those who would like to explore or enhance regulatory writing skills. We assume the reader will have a basic understanding of written communication but little experience in applying this skill to the task of regulatory writing. Extensive knowledge of science, clinical medicine, mathematics, or regulatory affairs law is not required to use the best practices described in this book.
