Geography, Study Guide Harm J. de Blij, Peter O. Muller, 1994-01-26 A penetrating look at the geographical framework of the contemporary world using the geographic perspective and geography's spatial terminology to investigate the globe's great geographic regions. Features complete, balanced and in-depth coverage of human, culture, historical, physical and economic geography along with the very latest developments and implications. As in previous editions, this one contains outstanding, illustrative materials including over 200 detailed maps.

Geography Regions and Concepts, Study Guide Harm J. de Blij, Peter O. Muller, 1991-01-18 This solid introduction provides an overview of world regional geography and is strongly grounded in spatial concepts and linked to basic systematic geography. Organized according to developed and less developed regions, it covers the human and physical foundations of world geography: Europe, the Soviet Union, North America, Australia, Japan, Middle and South America, Africa, Southwest Asia, South Asia, China and Southeast Asia. As with previous editions, the Sixth Edition features outstanding, illustrative material and a full color cartographic program but also incorporates four major chapter revisions, substantial updating and a new chapter on opening maps. Among the major topics covered are regional concepts and classification, culture and landscape, and physical environmental dimensions. Specifics for each region are also discussed, such as changing natural environment, history, settlement, population, politics, economics and their impact, industrialization and urbanization, environmental hazards and much more.

Geography, Study Guide Peter O. Muller, Elizabeth Muller-Hames, 2005-11-29 Study Guide to accompany Geography: Realms, Regions, and Concepts, 12th Edition. Provides readers with a spatial understanding of the human and physical characteristics of the earth and is by nature an integrative discipline that challenges readers to consider the relationships between natural and human variables. They will learn to think critically about the interdependency of the earth's systems and make informed decisions about a variety of highly relevant environmental, cultural, and economic topics such as globalization, global warming, deforestation, economic development, and resource use.
