## **Mental Health Recovery Advanced Strategies:**

Recovery in Mental Health Michaela Amering, Margit Schmolke, 2009-06-22 Winner of Medical Journalists Association Specialist Readership Award 2010 Recovery is widely endorsed as a guiding principle of mental health policy Recovery brings new rules for services e.g. user involvement and person centred care as well as new tools for clinical collaborations e.g. shared decision making and psychiatric advance directives. These developments are complemented by new proposals regarding more ethically consistent anti discrimination and involuntary treatment legislation as well as participatory approaches to evidence based medicine and policy. Recovery is more than a bottom up movement turned into top down mental health policy in English speaking countries. Recovery integrates concepts that have evolved internationally over a long time. It brings together major stakeholders and different professional groups in mental health who share the aspiration to overcome current conceptual reductionism and prognostic negativism in psychiatry. Recovery is the consequence of the achievements of the user movement. Most conceptual considerations and decisions have evolved from collaborations between people with and without a lived experience of mental health problems and the psychiatric service system. Many of the most influential publications have been written by users and ex users of services and work groups that have brought together individuals with and without personal experiences as psychiatric patients. In a fresh and comprehensive look this book covers definitions, concepts and developments as well as consequences for scientific and clinical responsibilities. Information on relevant history, state of the art and transformational efforts in mental health care is complemented by exemplary stories of people who created through their lives and work an evidence base and direction for Recovery. This book was originally published in German. The translation has been fully revised, references have been amended to include the English language literature and new material has been added to reflect recent developments. It features a Foreword by Helen Glover who relates how there is more to recovery than the absence or presence of symptoms and how health care professionals should embrace the growing evidence that people can reclaim their lives and often thrive beyond the experience of a mental illness. Comments on German edition: It is fully packed with useful information for practitioners, is written in jargon free language and has a good reading pace. Theodor Itten St Gallen, Switzerland and Hamburg, Germany. This book is amazingly positive. It not only talks about hope, it creates hope. Its therapeutic effects reach professional mental health workers, service users and carers alike. Fleet footed and easily understandable at times, it reads like a suspense novel. Andreas Knuf pro mente sana, Switzerland. This is the future of psychiatry cheered a usually service oriented manager after reading the book. We might not live to see it. Ilse Eichenbrenner, Soziale Psychiatrie, Germany.

**Transforming Mental Health Services** Howard H. Goldman, Jeffrey A. Buck, Kenneth S. Thompson, 2009-06-26 This compendium of 17 articles addresses the goals set forth by the President's New Freedom Commission on Mental Health in its 2003 report Achieving the Promise Transforming Mental Health Care in America The report represents the first time since the Carter Administration that such a high level group evaluated U.S. mental health care The report painted a dismal picture of the nation's mental health system saying the system was so broken that it was beyond simple repair The Commission said that current services focused on managing disabilities rather than helping patients achieve a meaningful life in their communities It also stated that mental health service providers ignored the preferences of consumers and their families The articles in Transforming Mental Health Services Implementing the Federal Agenda for Change originally published between 2006 and 2009 in Psychiatric Services journal of the American Psychiatric Association offer recommendations to assist adults with serious mental illness and children with serious emotional disturbances They include a series of reforms in which the emphasis is on recovery as an achievable goal and the need for a person centered orientation in service delivery There is also discussion of the reasons many service providers resist using a recovery orientation and how this can be remedied Transforming Mental Health Services Implementing the Federal Agenda for Change consists of updates of papers written by the Commission's subcommittees addressing issues fundamental to those living with mental illness It is organized into four sections The first focuses on the interface between mental health and general health and on employment housing and Medicaid financing The second continues addressing financing and Medicaid as well as issues related to school mental health recovery transformation of data systems and acceleration of research The third includes reports from four states with transformation initiatives designed to ensure that consumers have a strong voice in the development of recovery oriented services The final section describes progress five years after the President's Commission Report and concludes with a proposal by the current director of the Center for Mental Health Services for a public health model of mental health care for the 21st century This compilation of well researched and well written articles offers an excellent resource for frontline care providers facility administrators and advocates It serves as an equally valuable resource for state policy makers who wish to present a convincing case that change is happening and that the recommendations can be translated into effective policies Although consumers and their families will receive support for their perception that service providers ignore their needs they will also be encouraged that change for the better is coming to the U.S. mental health care system **Handbook of Community Psychiatry** Hunter L.
