Onboarding Training For Elected Officials:

Ethics and Innovation in Public Administration Gilles Rouet, Stela Raytcheva, Thierry Côme, 2024-09-12 This edited volume analyzes the ethics of innovations in the public sector in Europe. The book presents a theoretical analysis of empirical cases deepening the understanding of innovation in public administration by identifying common processes across various local contexts. It also delves into the study of the European Union's ethics and values exploring their impact on innovation at both European and local levels. Additionally the book features comprehensive case studies encompassing different sectors, professions and statuses within public administration providing a multifaceted examination of innovation's complexities. By considering multiple perspectives including those of citizens, politicians, managers, trade unions, NGOs and political leaders, the book offers a holistic understanding of the ethical challenges associated with innovation in public administration. It also addresses entrepreneurship, successful initiatives, struggles and resistance to change, training for elected representatives and the integration of an ethical approach into local authority communications. As such this volume will be an essential resource for scholars, practitioners, policymakers and anyone navigating the intricate landscape of ethical decision making in European public administration.

Integrating Sustainability Into Major Projects Wayne McPhee, Sabrina M. Dias, 2020-01-29 A practitioner focused guide featuring tools, models and experience from the front lines of sustainability management on major projects. With the growing need for sustainability management on large resource infrastructure and power projects, this book provides project teams and sustainability practitioners with the practical advice, tools and resources they need to create better projects. It offers extensive guidance for integrating sustainability into project design, planning and delivery. In each chapter, the authors provide invaluable sustainability management strategies and sample tools for project execution plans, engineering decision making, stakeholder engagement, tracking, logging, commitments and follow up actions, permit tracking and construction management. **Integrating Sustainability into Major Projects: Best Practices and Tools for Project Teams** begins by introducing readers to the topic as well as the common terminology. It then offers readers an overview of major projects, covering types of projects and project structures, the key players and how to understand and manage different perspectives of time and space. Next it looks at standards and guidelines followed by chapters on Project Management, Managing Risk and Opportunity, Sustainability Management Tools, Approvals and Permits, Design, Procurement, Construction Management, Commissioning and more. This book provides analysis tools and resources that practitioners and project teams can use to successfully integrate and manage sustainability into major project design and delivery, including industrial, resource, power and infrastructure projects. Guides readers on how to work with local communities, engage with stakeholders and develop sustainability programs that support project financing. Includes case studies, lessons learned and expertise from a wide range of actual major projects and the authors' professional experiences with integrating sustainability. Leads practitioners through the major project types and their typical components, structure and timelines and demonstrates how

sustainability can be effectively integrated into each type of major project Integrating Sustainability into Major Projects provides the tools project teams need to successfully integrate sustainability into project design and management making it an ideal tool for project teams and sustainability practitioners working on major resource power or infrastructure projects It will also benefit project owners organizational leaders project finance professionals government regulators and graduate students in engineering project management sustainability management or environmental design and architecture
