Information Systems and Commercial Vehicle Operations Barry H. Kantowitz, 1997 The goal of the activities documented in this report was to produce a prioritized list of candidate studies and issues that would guide data acquisition in this project. This goal was accomplished in three steps. First 91 issues were compiled from earlier research in this effort. Second a set of 14 criteria 9 substantive and 5 methodological were defined. Eight experienced human factors experts completed all 2 184 cells in a rating matrix for a total of 17 472 rating entries in the data set. Third a linear psychometric model was used to prioritize the 91 issues. The model was validated by sending the raters three short prioritized lists one of which was unknown to the raters a stratified random sample of studies and issues Advanced Lighting Guidelines New Buildings Institute, 2001
