Quality Telefantasy Andrew Lynch, 2022-03-28 This book explores the relatively new genre of Quality Telefantasy and how it has broadened TV taste cultures by legitimating and mainstreaming fantastical content. It also shows how the rising popularity of this genre marks a distinct and significant development in what kinds of TV are culturally dominant and critically regarded. By expanding and building on the definition of US Quality TV, this book brings together a number of popular science fiction, fantasy and horror TV series including Game of Thrones, The Walking Dead and Westworld as case studies which demonstrate the emergence of the Quality Telefantasy genre. It looks at the role of technology including internet recap culture and subscription video on demand distribution in Quality Telefantasy's swift emergence and analyses its success internationally by considering series created outside the US like Kingdom, South Korea, Netflix and Dark, Germany, Netflix. The book argues that Quality Telefantasy series should be considered a part of the larger Quality TV super genre and that the impact they are having on the global TV landscape warrants further investigation as it continues to evolve. This is a valuable text for students and scholars studying or undertaking research in the areas of television studies, new media and pop cultural studies.

The Last Hope: A Dystopian Science Fiction Tale Sudhakar, 2023-07-15 In *The Last Hope: A Dystopian Science Fiction Tale*, the subchapter titled "The Collapse of Society" delves into the chilling and thought-provoking concept of a world teetering on the edge of destruction. Addressed primarily to parents, this subchapter explores the themes and genres of science fiction, particularly focusing on dystopian science fiction, space opera, cyberpunk, time travel and steampunk. Dystopian science fiction has long captivated readers with its portrayal of post-apocalyptic worlds and the social and political implications that arise in such settings. It forces us to confront the potential consequences of societal collapse and the fragility of our own civilization. importance of empathy resilience and critical thinking in an uncertain future

Endangering Science Fiction Film Sean Redmond, Leon Marvell, 2015-06-26 Endangering Science Fiction Film explores the ways in which science fiction film is a dangerous and endangering genre. The collection argues that science fiction's cinematic power rests in its ability to imagine Other worlds that challenge and disturb the lived conditions of the real world as it is presently known to us. From classic films such as 2001 A Space Odyssey and Solaris to modern blockbusters including World War Z and Gravity and directors from David Cronenberg to Alfonso Cuarón, contributors comment on the way science fiction film engages with dangerous encounters, liminal experiences, sublime aesthetics and untethers space and time to question the very nature of human existence. With the analysis of a diverse range of films from Europe, Asia, North and South America, Endangering Science Fiction Film offers a uniquely interdisciplinary view of the evolving and dangerous sentiments and sensibility of this genre.

Reimagining Science Fiction Gary Westfahl, 2025-10-31 In the first decades of the twenty first century science fiction literature has been transformed in many ways as the genre has reacted to the dominating influence of films, television and video games, the growing popularity of fantasy, the rise of young adult science fiction and graphic novels, the impact of the internet and social media and the increasing diversity of the authors, characters and often non Western settings. The essays making up this volume address these and other changes in two ways. Some consider new critical approaches to science fiction in response to changing circumstances including analyses of how evolutionary psychology explains today's science fiction, the emerging subgenre of cli fi exploring the effects of climate change, the use of science fiction in different areas of the college curriculum and a statistical method for identifying works of science fiction. Others examine significant new authors such as Nalo Hopkinson, Charles Stross, Paolo Bacigalupi, Suzanne Collins, Mira Grant, John Sandford and David Mura. Contributors include science fiction author Howard V. Hendrix and experts in the fields of Chinese studies, gender studies, literature, philosophy and religion.
