Location

Lighting Handbook for Portrait Photographers Stephanie Zettl, Peter Zettl, 2015-10-01. On location photographers are faced with ever changing lighting conditions due to the time of day, the weather or the surroundings and this book explores how to evaluate, use and shape the available light to get the best results in any situation. The book begins by showing photographers how to assess available light and exposure, providing information on the quality and characteristics of light and the necessary tools and techniques for measuring them. The guide then focuses on portable lighting solutions that a single photographer can use with minimal or no assistance to customize the given light from on camera flashes and monolights with battery packs to umbrellas, soft boxes and LED video lights. Numerous examples of difficult lighting situations are offered as well as the progression of different light sources used both correctly and incorrectly to capture the final photograph.
