**Loose Leaf for A Topical Approach to Life-Span Development** John W Santrock,2019-09-24 **Handbook of Research on Prenatal, Postnatal, and Early Childhood Development** Aral, Neriman,2020-03-20

Child development comprises children's cognitive linguistic motor social and emotional development communication and self care skills Understanding developmental periods means that possible problems or roadblocks can be planned for or prevented Knowledge of child development is necessary for achieving educational goals and is integral to promoting children's healthy and timely development The Handbook of

Research on Prenatal Postnatal and Early Childhood Development is an essential scholarly reference source that compiles critical findings on children's growth periods and characteristics as well as the principles that affect their development. Covering a wide range of topics such as at-risk children, early intervention and support programs, this book is ideally designed for child development specialists, pediatricians, educators, program developers, administrators, psychologists, researchers, academicians, and students. Additionally, the book provides insight and support to health professionals working in various disciplines in the field of child development and health.

*Racial Disproportionality in Child Welfare* Marian S. Harris, 2014-04-15. The number of children of color entering the child welfare system in the United States is disproportionately high. Not only are children of color removed from parental custody and placed in care more often than their white counterparts, but they also remain in care longer, receive fewer services, and have less contact with the caseworkers assigned to them. This book identifies the practice and policy changes required to successfully address the unequal treatment of children of color in the child welfare system and their implications for social work education, caseworker training, and institutional change. It critiques many of the existing social welfare acts and policies in terms of their treatment of children of color and provides best practices for each decision point in the child welfare process and for cultural competency measures and training. The text offers extensive measurement instruments that agencies can use to assess and correct institutional racism. To improve social work education, the book includes several model syllabi for the curriculum and to deepen the discipline's engagement with the issue of institutional racism, the text concludes with a discussion of future directions for research and policy.
