The Oxford Handbook of Science Fiction attempts to descry the historical and cultural contours of SF in the wake of technoculture studies. Rather than treating the genre as an

isolated aesthetic formation it examines SF's many lines of cross pollination with technocultural realities since its inception in the nineteenth century showing how SF's unique history and subcultural identity has been constructed in ongoing dialogue with popular discourses of science and technology The volume consists of four broadly themed sections each divided into eleven chapters Section I Science Fiction as Genre considers the internal history of SF literature examining its characteristic aesthetic and ideological modalities its animating social and commercial institutions and its relationship to other fantastic genres Section II Science Fiction as Medium presents a more diverse and ramified understanding of what constitutes the field as a mode of artistic and pop cultural expression canvassing extra literary manifestations of SF ranging from film and television to videogames and hypertext to music and theme parks Section III Science Fiction as Culture examines the genre in relation to cultural issues and contexts that have influenced it and been influenced by it in turn the goal being to see how SF has helped to constitute and define important sub cultural groupings social movements and historical developments during the nineteenth twentieth and twenty first centuries Finally Section IV Science Fiction as Worldview explores SF as a mode of thought and its intersection with other philosophies and large scale perspectives on the world from the Enlightenment to the present day
