Emotional Intelligence in the Digital Era Pushan Kumar Dutta, Sachin Gupta, Shafali Kashyap, Anita Gehlot, Rita Karmakar, Pronaya Bhattacharya, 2025-05-23 This edited book aims to bring together the latest research in the field of human psychology emotional intelligence and technology The book is a platform for experts to share their knowledge on how virtual technology and techniques can be used to promote mental health and emotional intelligence **Self-management and Leadership Development** Mitchell Grant Rothstein, Ronald J. Burke, 2010-01-01 This book is based on a really important timely and relevant idea to bring together sources on the self management of leadership development The book is important because almost all leadership development relies to a great degree on the leader's capability to manage his or her personal development It is timely because there is currently no single volume that covers the topic and it is relevant because leadership is such an extremely important issue for the success of our organizations countries and society in general The editors have done a thoroughly professional job in identifying top quality authors and combining their contributions into a very worthwhile volume Ivan Robertson University of Leeds UK Self Management and Leadership Development offers a unique perspective on how leaders and aspiring leaders can and should take personal responsibility for their own development This distinguished book is differentiated from other books on this topic with its view on the instrumental role played by individuals in managing their own development rather than depending on others such as their organization to guide them Expert scholars in the area of leadership emphasize the importance of self awareness as the critical starting point in the process Explicit recommendations are provided on how

individuals can manage their own self assessment as a starting point to their development. The contributors present insights and practical recommendations on how individuals can actively self manage through a number of typical leadership challenges. Business school faculty teaching electives in leadership and managers who engage in leadership development for themselves or others should not be without this important resource. Consulting firms and training institutions offering leadership development programs and participants in MBA and executive development programs will also find it invaluable.

Assessing Emotional Intelligence Peter Carblis, 2014-05-14 In this groundbreaking book the author advocates that many relational collapses are the result of ineptitude rather than ill will. That is they are the result of a lack of skills rather than a lack of goodwill. As this book puts it many of society's relational problems may be competency related. This might be good news since competencies can be learned. The purpose of this book is to take a careful look at how such competencies can be developed. Beginning with the view that if such competencies can be learned they must first be defined and have standards set for them it asks the question Can competency standards be designed for soft skills? It is argued that the answer is yes. Locating itself in the workplace context where adults often spend most of their lives but relevant to life in general this book shows how theoretically sound competency standards can be developed for selected soft skills. This is done by adapting a methodology used to specify workplace competency standards. The book also notes a number of practical and ideological issues that must be considered at implementation. This book shows how standards for three such skills have been developed and provided with a preliminary workplace validation. The skills selected are related to interpersonal skills and are derived from the framework of emotional intelligence competencies popularised by Goleman. This is an important book for those in business studies.

Competency & Emotional Intelligence Benchmarking , 2006 **Permission to Feel** Marc Brackett, Ph.D., 2019-09-03 The mental well being of children and adults is shockingly poor. Marc Brackett author of *Permission to Feel* knows why. And he knows what we can do. We have a crisis on our hands and its victims are our children. Marc Brackett is a professor in Yale University's Child Study Center and founding director of the Yale Center for Emotional Intelligence. In his 25 years as an emotion scientist he has developed a remarkably effective plan to improve the lives of children and adults a blueprint for understanding our emotions and using them wisely so that they help rather than hinder our success and well being. The core of his approach is a legacy from his childhood from an astute uncle who gave him permission to feel. He was the first adult who managed to see Marc listen to him and recognize the suffering, bullying and abuse he'd endured. And that was the beginning of Marc's awareness that what he was going through was temporary. He wasn't alone he wasn't stuck on a timeline and he wasn't wrong to feel scared, isolated and angry. Now best of all he could do something about it. In the decades since Marc has led large research teams and raised tens of millions of dollars to investigate the roots of emotional well being. His prescription for healthy children and their parents, teachers and schools is a system called RULER a high impact and fast effect approach to understanding and mastering emotions that has already transformed the thousands of schools that have

adopted it RULER has been proven to reduce stress and burnout improve school climate and enhance academic achievement This book is the culmination of Marc s development of RULER and his way to share the strategies and skills with readers around the world It is tested and it works This book combines rigor science passion and inspiration in equal parts Too many children and adults are suffering they are ashamed of their feelings and emotionally unskilled but they don t have to be Marc Brackett s life mission is to reverse this course and this book can show you how Therapeutic Reasoning in Occupational Therapy - E-Book Jane Clifford O'Brien, Mary Beth Patnaude, Teressa Garcia Reidy, 2021-12-24 Build the clinical reasoning skills you need to make sound decisions in OT practice Therapeutic Reasoning in Occupational Therapy How to Develop Critical Thinking for Practice uses practical learning activities worksheets and realistic cases to help you master clinical reasoning and critical thinking concepts Video clips on the Evolve website demonstrate therapeutic reasoning and show the diverse perspectives of U S and international contributors Written by OT experts Jane Clifford O'Brien, Mary Elizabeth Patnaude and Teressa Garcia Reidy this how to workbook makes it easier to apply clinical reasoning in a variety of practice settings Dynamic interactive approach reinforces your understanding with learning activities in each chapter Case studies and experiential learning activities flow from simple to complex and represent occupational therapy across the lifespan AOTA s Occupational Therapy Practice Framework 4th Edition and current OT practice are reflected throughout the book Practical learning activities and templates are clinically relevant and designed to support reasoning in a variety of practice settings Video clips on the Evolve website are contributed by practitioners educators and students reinforcing content and showing how therapeutic reasoning applies to real world cases Worksheets and or templates are included in each chapter to enhance learning and for use in practice Assessments in each chapter measure therapeutic reasoning outcomes Student and practitioner resources on Evolve include printable PDFs of the in text worksheets video clips additional case examples templates for assignments exemplars and reflective activities
