A World Scientific Encyclopedia Of Business Storytelling, Set 1: Corporate And Business Strategies Of Business Storytelling (A 5-volume Set), 2023-08-17

This set of multi reference works is meant to be read together as the five volumes interlace one another like the laces of a shoe in the famous painting by Vincent van Gogh Who will wear the shoes is a question long debated in art history and philosophy If we take these five volumes from different points of view on the theory and practice of business storytelling then we have a crisscrossing a new and impressive dialogue for the reader This set is presented as a new way to lace up the laces of business storytelling Volume 1 aims to recount narratives in a variety of ways so that the precepts of entrepreneurial storytelling can be made accessible to a variety of audiences academic practitioner student and community member Entrepreneurship has a long history and tradition but there are disputed ways of doing business storytelling in entrepreneurship that the next four volumes articulate Volume 2 provides insights into stories fostering the idea of business and not necessarily business itself It focuses specifically on history contributing to the current debates within management and organizational history around the idea of the historic turn It reflects on the idea of business and beyond could there be more to history and business

storytelling than what has previously been accepted in the field This book sets out to explore a diverse array of alternative modes and multiple ways of storying organizations The editors intentionally sought to involve an international network of

authors with diverse storytelling accounts of history as a way of helping build out this new storytelling paradigm in a diverse and inclusive ethic As a result this volume showcases a broad spectrum of critical storytelling from geographically diverse authors working in universities small businesses and public service throughout Brazil Canada Finland the United Kingdom and the United States To reflect these dynamics and for the stories in this volume to fit together chapters were organized into three themes stories of processing history tales of history as method and narratives of history through a business opportunity Volume 3 features stories that reflect the exacerbated inequalities of race gender and income across the world

These inequalities and power relations remain continuously contested particularly in these trying times despite being captive to a particular economic ideology built on the premise of exploitation and subjugation The stories told in this volume tell against the orthodoxy the colonizer and the seemingly powerful They are organized as stories of resistance emancipation and transformation They invite us to rethink the multiple ways to re structure power relations between the colonizer and the

colonized and open up spaces for the marginalized underprivileged voices Volume 4 is designed to create a new business storytelling paradigm that critically approaches business narratives that have historically privileged a corporate agenda It explores the various ways that images of the other in business are developed presented and accounted for through powerful and dominant narratives The stories in this volume collectively help readers to understand resist and provide strategies for change through various analyses of how business narratives come to develop get written are legitimized are challenged and get changed over time Volume 5 brings together the practices specific to the socioeconomic approach to management SEAM SEAM is a method of change management developed through research interventions carried out in more than 2 000 companies and organizations since 1975 This method is systemic it considers the whole company and tends to simultaneously increase social and economic performance by focusing mainly on the development of human skills and behaviors making it possible to reduce dysfunctions and recycle hidden costs into added value Break the Rules!
