## Cli Fi Novel Award Winning:

**Cli-Fi and Class** Debra J. Rosenthal, Jason de Lara Molesky, 2023-10-09 Since its emergence in the late twentieth century climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures. Indeed with its insistent focus on redressing social disparities cli fi might reasonably be classified as a form of protest literature. As environmental crises escalate and inequality intensifies literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth's ecosystems and the socioeconomically disadvantaged. Cli Fi and Class focuses on the representation of class dynamics in climate change narratives. With fifteen essays on the intersection of the economic and the ecological addressing works ranging from the novels of Joseph Conrad, Cormac McCarthy and Octavia Butler to the film Black Panther and the Broadway musical Hadestown this collection unpacks the complex ways economic exploitation impacts planetary well being and the ways climatic change shapes those inequities in turn.

**Teaching the Literature of Climate Change** Debra J. Rosenthal, 2024-04-26 Over the past several decades writers such as Margaret Atwood, Paolo Bacigalupi, Octavia E. Butler and Kathy Jetner have explored climate change through literature reflecting current anxieties about humans impact on the planet. Emphasizing the importance of interdisciplinarity this volume embraces literature as a means to cultivate students understanding of the ongoing climate crisis ethics in times of disaster and the intrinsic intersectionality of environmental issues. Contributors discuss speculative climate futures the Anthropocene, postcolonialism, climate anxiety and the usefulness of storytelling in engaging with catastrophe. The essays offer approaches to teaching interdisciplinary and cross listed courses including strategies for team teaching across disciplines and for building connections between humanities majors and STEM majors. The volume concludes with essays that explore ways to address grief and to contemplate a hopeful future in the face of apocalyptic predictions.

**Dystopias and Utopias on Earth and Beyond** Douglas A. Vakoch, 2021-04-29 Caught as we are in a grave climate crisis that seems more irreversible with every passing year our literary portrayals of the future often feature the dystopian collapse of the world as we know it. Science fiction explores how we got here while pointing toward a more hopeful path forward. From an ecofeminist perspective a core cause of our current ecological catastrophe is the patriarchal domination of nature playing out in parallel with the oppression of women. As an alternative to dystopian futures that seem increasingly inevitable ecofeminist science fiction helps us conjure utopias that promote environmental sustainability based on more egalitarian human relationships. Dystopias and Utopias on Earth and Beyond Feminist Ecocriticism of Science Fiction explores the fictional worlds of such canonical novelists as Margaret Atwood, Octavia Butler, Ursula K. Le Guin, Doris Lessing and Joan Slonczewski as well as those of lesser known science fiction writers as they collectively probe humanity's greatest existential threats. Contributors from five continents provide compelling analyses of far future dystopias on Earth that are all too easy to imagine becoming reality if humankind's current trajectory continues as well as provocative insights into science fiction utopias set on idyllic planets.

orbiting distant stars which offer liberatory alternatives that might someday be actualized in the real world By examining the links between the destruction of the environment and the domination of women Dystopias and Utopias on Earth and Beyond provides the tools to counteract those intertwined oppressions helping create a foundation for a truly habitable world
