Regulating the Crypto Economy Iris H-Y Chiu,2021-10-21 This book focuses on the building of a crypto economy as an alternative economic space and discusses how the crypto economy should be governed The crypto economy is examined in its productive and financialised aspects in order to distil the need for governance in this economic space The author argues that it is imperative for regulatory policy to develop the economic governance of the blockchain based business model in order to facilitate economic mobilisation and wealth creation The regulatory framework should cater for a new and unique enterprise organisational law and the fund raising and financing of blockchain based development projects Such a regulatory framework is crucially enabling in nature and consistent with the tenets of regulatory capitalism Further the book acknowledges the rising importance of private monetary

orders in the crypto economy and native payment systems that do not rely on conventional institutions for value transfer A regulatory blueprint is proposed for governing such monetary orders as commons governance The rise of Decentralised Finance and other financial innovations in the crypto economy are also discussed and the book suggests a framework for regulatory consideration in this dynamic landscape in order to meet a balance of public interest objectives and private interests By setting out a reform agenda in relation to economic and financial governance in the crypto economy this forward looking work argues for the extension of regulatory capitalism to this perceived wild west of an alternative economic space It advances the message that an innovative regulatory agenda is needed to account for the economically disruptive and technologically transformative developments brought about by the crypto economy
