Military Design Thinking Aaron P. Jackson, 2024-09-30 This book examines the newly emergent field of military design thinking how it has been developed inside and outside of military doctrine and the paradigms that underlie its key thinkers and methodologies From the emergence of its initial methodologies in the late 1990s military design thinking's development rapidly accelerated in the mid 2000s in response to perceived failures of existing military doctrine and practice to adapt to the wars of the early 21st century To establish a foundation for exploring the significance of the challenge military design thinking presented to dominant approaches to warfare the early chapters in the book examine the ontology and epistemology of military doctrine which is defined as a written expression of a military's institutional belief system regarding how to wage war They also explain how attempts to incorporate military design thinking into doctrine ultimately led to its assimilation into this belief system requiring military design thinkers to continue to explore and develop the field outside of doctrine Since the mid 2010s non doctrinal military design methodologies have become increasingly prominent within several Western militaries including the US Canada UK Australia and several European militaries Later chapters offer an exploration of the paradigms underlying non doctrinal as well as doctrinal design methodologies This book highlights how the field has evolved shows how military design thinking differs from its civilian equivalents developed in fields such as commerce and business management and discusses how it may evolve in the near future This book will be of much interest to students of military studies security studies and international relations as well as to military professionals

One Nation Undecided Peter H. Schuck, 2019-08-06 At a time of deep social and political division along comes a much needed book to steer us toward solutions to five very difficult national problems There could be no better guide for this endeavor than Peter Schuck one of the clearest and most thoughtful legal and policy scholars of this or any generation Robert E Litan author of Trillion Dollar Economists's

International Arbitration in the Energy Sector Maxi Scherer, 2018-02-22 Disputes in the energy and natural resources sector are at the heart of international arbitration With more arbitrations arising in the international energy sector than in any other sector it is not surprising that the highest valued awards in the history of arbitration come from energy related arbitrations Energy disputes often involve complex and controversial issues relating to security sovereignty and public welfare International Arbitration in the Energy Sector puts international energy disputes into a global context providing broad coverage of different forms and systems of dispute resolution across both renewable and non renewable sectors With contributions from leading arbitrators academics and industry experts from across the globe the twenty chapters in the book enable readers to compare the approaches to and learnings from energy arbitrations across various legal systems and geographic regions After outlining the international energy arbitration legal framework in Part I the text delves into a detailed analysis of the problems which regularly arise in practice These include among other things commercial disputes in Part II e.g. over the upstream oil sector and long term gas supply contracts investor state disputes in

Part III e.g. under the Energy Charter Treaty and public international law disputes in Part IV e.g. concerning international boundaries and the distribution of natural resources. Alongside recent developments in the international energy sector, attention is given to climate and sustainable development disputes which raise important questions about enforcing sustainability objectives on individuals, corporations and states. Backed by analyses of arbitral awards, national court and international tribunal decisions, treaties and other international legal instruments as well as current events and news in the energy industry, this text offers a unique contribution to international energy literature and provides insightful commentary on the prevalent issues in the field. It is essential reading for any practitioner or researcher in the energy and natural resources sector.

Seeking Truth and Hiding Facts Jeremy L. Wallace, 2023. A unique analysis of the numbers that came to define Chinese politics and how this quantification evolved over time. For decades, a few numbers came to define Chinese politics until those numbers did not count what mattered and what they counted did not measure up. *Seeking Truth and Hiding Facts* argues that the Chinese government adopted a system of limited quantified vision in order to survive the disasters unleashed by Mao Zedong's ideological leadership. Jeremy Wallace explains how that system worked and analyzes how the problems that accumulated in its blind spots led Xi Jinping to take drastic action. Xi's neopolitical turn, aggressive anti-corruption campaigns, reassertion of party authority and personalization of power is an attempt to fix the problems of the prior system as well as a hedge against an inability to do so. The book argues that while of course dictators stay in power through coercion and cooptation, they also do so by convincing their populations and themselves of their right to rule. Quantification is one tool in this persuasive arsenal, but it comes with its own perils.

The Performance of Africa's International Courts James Thuo Gathii, 2020-11-26. The performance of international courts has traditionally been judged against criteria of compliance and effectiveness. Whilst these are clearly desirable objectives for litigants before Africa's international courts, this book shows that we must look beyond these criteria to fully appreciate the impact of these courts. This book shows how litigants use their participation in international litigation to achieve other objectives: to amplify political disputes with their governments, to build their movement, to educate the public about their cause and to challenge the status quo. Chapters in this collection show how these courts act as coordination points for opposition political parties to name and shame dominant parties for violation of their organizational rights. Others demonstrate how Africa's international courts serve as transitional justice mechanisms in which truth-telling about ongoing conflict and authoritarian governance receives significant attention. This attention serves as a platform to galvanize resistance against continued authoritarian rule, especially from outside the conflict countries. Ultimately, the book shows that these courts must be judged against new and broader criteria and understood as increasingly important venues for waging political, social, environmental and legal struggles.

The Performative State Iza Yue Ding, 2022-09-15. What does the state do when public expectations exceed its governing capacity? *The Performative State* shows how the state can shape public perceptions and defuse crises through the

theatrical deployment of language symbols and gestures of good governance performative governance Iza Ding unpacks the black box of street level bureaucracy in China through ethnographic participation in depth interviews and public opinion surveys She demonstrates in vivid detail how China's environmental bureaucrats deal with intense public scrutiny over pollution when they lack the authority to actually improve the physical environment They assuage public outrage by appearing responsive benevolent and humble But performative governance is hard work Environmental bureaucrats paradoxically work themselves to exhaustion even when they cannot effectively implement environmental policies Instead of achieving performance legitimacy by delivering material improvements the state can shape public opinion through the theatrical performance of goodwill and sincere effort The Performative State also explains when performative governance fails at impressing its audience and when governance becomes less performative and more substantive Ding focuses on Chinese evidence but her theory travels comparisons with Vietnam and the United States show that all states democratic and authoritarian alike engage in performative governance
