Fees Must Fall Susan Booysen,2016-10-01 This book explores the student discontent a year after the start of the 2015 South African FeesMustFall revolt FeesMustFall the student revolt that began in October 2015 was an uprising against lack of access to and financial exclusion from higher education in South Africa More broadly it radically questioned the socio political dispensation resulting from the 1994 social pact between big business the ruling elite and the liberation movement The 2015 revolt links to national and international youth struggles of the recent past and is

informed by black consciousness politics and social movements of the international left Yet its objectives are more complex than those of earlier struggles The student movement has challenged the hierarchical top down leadership system of university management and it s double speak of professing to act in workers and students interests yet entrenching a regressive system for control and governance University managements while on one level amenable to change have also co opted students into their ranks to create co responsibility for the highly bureaucratised university financial aid that stands in the way of their social revolution This book maps the contours of student discontent a year after the start of the FeesMustFall revolt Student voices dissect colonialism improper compromises by the founders of democratic South Africa feminism worker rights and meaningful education In depth assessments by prominent scholars reflect on the complexities of student activism its impact on national and university governance and offer provocative analyses of the power of the revolt      *Reflections of South African Student Leaders: 1994 to 2017* Ntokozo Bhengu,Denyse Webbstock,2020-05-13 *Reflections of South African Student Leaders 1994 2017* brings together the reflections of twelve former SRC leaders from across the landscape of South African universities Reviews of the previous volume 1981 2014 suggested that it contributed significantly to a better understanding of the stringent demands of visionary and transformative leadership required by university leaders in the fastchanging and increasingly complex public higher education sector This volume is based on comprehensive interviews with former student leaders each of whom provided a personal account in their own words of their experience in the position of student leadership The interviewees are from different backgrounds and of diverse political persuasions The book is important for current and future leaders of higher education institutions as it provides insights into the thinking aspirations desires fears and modus operandi of student leaders Such insight can contribute to developing and implementing appropriate strategies for achieving meaningful and constructive engagement with current and future student leaders      Inclusive Education in South African Further and Higher Education Tsediso Michael Makoelle,Cina P. Mosito,2025-05-26 A historical overview of the evolution of inclusive education alongside the emergence of concepts such as of equity and access highlighting how these ideas have evolved been enacted and practiced in the higher education institutions HEIs of South Africa since 2001      Governance and the postcolony David Everatt,2019-08-01 Civil society NGOs governments and multilateral institutions all repeatedly call for improved or good governance yet they seem to speak past one another Governance is in danger of losing all meaning precisely because it means many things to different people in varied locations This is especially true in sub Saharan Africa Here the postcolony takes many forms reflecting the imperial project with painful accuracy Offering a set of multidisciplinary analyses of governance in different sectors crisis management water food security universities in different locales across sub Saharan Africa and from different theoretical approaches network to adversarial network governance this volume makes a useful addition to the growing debates on how to govern It steers away from offering a correct definition of governance or from promoting a particular position on postcoloniality It gives no neat

conclusion but invites readers to draw their own conclusions based on these differing approaches to and analyses of governance in the postcolony As a robust critical assessment of power and accountability in the sub Saharan context Governance and the Postcolony Views from Africa brings together topical case studies that will be a valuable resource for those working in the field of African international relations public policy public management and administration *Global Development of the Community College Model* Carmen L.
