The Post-merger Integration (P.M.I) Nayla Khaled El-Tamer,American University of Beirut. Faculty of Arts and Sciences. Department of Political Studies and Public Administration,2001 Mergers and Acquisitions M A have become a widespread way to grow and fill capability gaps in organizations As the number of attractive candidates for merging is shrinking with time the prices are escalating forcing the acquirer to find more value in the target company Under such conditions integrating M A quickly and effectively becomes not only a source of expanded capabilities but also a source of survival Unfortunately fewer than half of the companies succeed in after the merger or acquisition deal according to the literature of management Therefore the important question to be asked is why and whether it is possible to improve the odds of success The answer to this question is the implementation of a Post Merger Integration Plan that covers three essential components Vision and Leadership Architecture and Culture

Mergers and Acquisition Rani Deshmukh, 2012 Although Mergers and Acquisitions are common no merger is termed as successful until post merger integration is successful During M A two companies that function uniquely are fused together and the Information Technology group is expected to consolidate two different systems efficiently This integration should be well executed and without any disruption to business or customers Every merger is different and can have innumerable reasons for failure ranging from poor implementation strategies to cultural or attitudinal problems One of the reasons many Post Merger Integration activities fail is due to the Information Technology complexity and inadequacy to address the issues it brings to the table This thesis aims at studying the importance of post merger Information Technology IT integration and

developing an IT strategy for the integration There are no scientific guidelines laid out for a post merger IT integration and each company employs its own methods Hence the author has researched and developed a post merger IT integration framework that can give definitive approach and assist in seamless integration This framework includes practices that can be followed for a smooth IT transition and checklist to ensure successful integration Lastly the author presents two cases of M A that illustrate the importance of IT integration namely Sallie Mae USA Group and HP Compaq Sallie Mae USA Group was a huge success due to its successful IT integration implementation while HP Compaq merger was a disappointment for the lack of understanding the importance of IT integration From these two cases the author has also derived the usefulness of the proposed framework Author has also presented another case of Oracle Sun merger which does an analysis of the IT integration carried out by the two companies It would not be unwise to say that IT plays an ever increasing pervasive role in today s organizations hence a successful merger demands successful IT integration
