Outer Continental Shelf Oil and Gas Leasing Program, 2012-2017 United States. Bureau of Ocean Energy Management,2011    **Rapid Excavation and Tunneling Conference 2013 Proceedings** Michael A. DiPonio,Chris Dixon,2013 Annotation Every two years industry leaders and practitioners from around the world gather at the Rapid Excavation and Tunneling Conference RETC the authoritative program for the tunneling profession This comprehensive book includes more than 100 papers from industry experts highlighting their most recent projects and sharing real world experiences that will keep you up to date on the latest tunneling trends and technologies    *Outer Continental Shelf Oil and Gas Leasing Program, 2012-2017* ,2011    Evolutionary Foundations of Economic Science Yuji Aruka,2014-10-04 This book aims to discern and distinguish the essential features of basic economic theories and compare them with new theories that have arisen in recent years The book focuses on seminal economic ideas and theories developed mainly in the 1930s to 1950s because their emergence eventually led to new branches of economics The book describes an alternative analytical framework spreading through the interdisciplinary fields of socioeconomic physics and sociodynamics The focus is on a set of branching or critical points that separate what has gone before from what has followed W Brian Arthur used the term redomaining when he referred to technological innovation In the present volume the author aims to re domain economic theories suited for a new social order Major technological innovations accompany not only changes in the economy and the market but changes in their meaning as well In particular the evolution of trading technology has changed the meaning of the invisible hand At the end of the last century the advent of socioeconomic physics became a decisive factor in the emergence of a new economic science This emergence has coincided with changes in the implications of the economy and the market which consequently require a redomaining of economic science In this new enterprise the joint efforts of many scientists outside traditional economics have brought brilliant achievements such as power law distribution and network analysis among others However the more diverse the backgrounds of economic scientists the less integrated the common views among them may be resulting in a sometimes perplexing potpourri of economic terminology This book helps to mitigate those differences shedding light on current alternative economic theories and how they have evolved    *Technological Innovation in Legacy Sectors* William B. Bonvillian,Charles Weiss,2015-08-18 The American economy misses opportunities for innovation growth and job creation because of a neglected problem the resistance to innovation from Legacy sectors like energy manufacturing and health care which constitute most of our economy The book offers systematic strategies to overcome the structural obstacles to innovation in critically important Legacy sectors    *Thorium Energy for the World* Jean-Pierre Revol,Maurice Bourquin,Yacine Kadi,Egil Lillestol,Jean-Christophe de Mestral,Karel Samec,2016-04-05 The Thorium Energy Conference ThEC13 gathered some of the world's leading experts on thorium technologies to review the possibility of destroying nuclear waste in the short term and replacing the uranium fuel cycle in nuclear systems with the thorium fuel

cycle in the long term. The latter would provide abundant reliable and safe energy with no CO<sub>2</sub> production, no air pollution and minimal waste production. The participants, representatives of 30 countries, included Carlo Rubbia Nobel Prize Laureate in physics and inventor of the Energy Amplifier, Jack Steinberger Nobel Prize Laureate in physics, Hans Blix former Director General of the International Atomic Energy Agency IAEA, Rolf Heuer Director General of CERN, Pascal Couchevin former President of the Swiss Confederation and Claude Haegi President of the FEDRE, to name just a few. The ThEC13 proceedings are a source of reference on the use of thorium for energy generation. They offer detailed technical reviews of the status of thorium energy technologies from basic R&D to industrial developments. They also describe how thorium can be used in critical reactors and in subcritical accelerator driven systems ADS, answering the important questions: Why is thorium so attractive and what is the role of innovation in particular in the nuclear energy domain? What are the national and international R&D programs on thorium technologies and how are they progressing? ThEC13 was organized jointly by the international Thorium Energy Committee iThEC, an association based in Geneva, and the International Thorium Energy Organisation IThEO. It was held in the Globe of Science and Innovation at the European Organization for Nuclear Research CERN, Geneva, Switzerland, in October 2013.
