Poststructuralism & International Relations Jenny Edkins,1999 Offering an introduction to the major poststructuralist thinkers this text shows how Foucault Derrida Lacan and Zizek expose the depoliticization found in conventional international relations theory poststructuralists are concerned with the big questions of international politics it is precisely their work that analyzes the political and explains the processes of depoliticization and technologization

Poststructuralism and International Relations Jenny Edkins,1999 Offering a sophisticated introduction to the major post structuralist thinkers this book shows how Foucault Derrida Lacan and i ek expose the depoliticization found in conventional international relations theory Edkins argues that contrary to the opinions of their detractors the poststructuralists are concerned with the big questions of international politics it is precisely their work that analyzes the political and explains the processes of depoliticization and technologization Paying particular attention to notions of the subject and subjectivity in relation to the political and to the relationship between ideology and social reality Edkins explores in short why Foucault and others matter for international relations

Whose Hunger? Jenny Edkins,2000 We see famine and look for the likely causes poor food distribution unstable regimes caprices of weather A technical problem we tell ourselves one that modern social and natural science will someday resolve To the contrary Jenny Edkins responds in this book Famine in the contemporary world is not the antithesis of modernity but its symptom A critical investigation of hunger famine and aid practices in international politics Whose Hunger shows how the forms and ideas of modernity frame our understanding of famine and consequently shape our responses

Political Ontology and International Political Thought Vassilios Paipais,2016-11-09 This book challenges received notions of ontology in political theory and international relations by offering a psychoanalytically informed critique of depoliticisation in prominent liberal post liberal dialogic and agonistic approaches to pluralism in world politics Paipais locates the temptation of depoliticisation in their labouring under the fundamental fantasy of various guises of foundationalism in the form of either political anthropology or ontology as in the last instance ground or conversely anti foundationalism the denial of all grounds yet still operating within a foundationalist imaginary He argues instead for a formal political ontology of the void against historicism shot through an incarnate messianic nihilism against ethicism and teleological forms of politics In so doing the author offers critical readings of the messianic nihilism of Benjamin Agamben Taubes and i ek by problematising the antinomian tendencies in their respective politicaltheologies The book argues for a version of i ek s Badiouian politics of militancy supplemented by a proper participatory understanding of St Paul s messianic meontology and incarnational Christology as a means to reconceptualise the nexus between subjectivity universality and political action in world politics It will be of interest to students and scholars of International Relations theory political theory critical social theory and political theology

'The Politics' and 'The Political' of the Eastern Partnership Initiative Elena Korosteleva,Igor Merheim-Eyre,Eske Van Gils,2019-10-23 The

Special Issue consolidates new approaches to the study of the EU's role in the eastern neighbourhood and beyond informed by post structuralist traditions in international relations. More specifically by revisiting the European Neighbourhood Policy's agenda from the conceptual perspective of the political and redefining the notions of othering, differentiation and normalisation, this volume renders a new and much needed theoretical and empirical outlook onto the policy developments and their practices. By unpacking and connecting security, regional, institutional, normative and sector thematic policy dimensions, the book seeks to re-politicise the agenda and re-focus policy revision on understanding the fundamentals of power relations when applied to the EU's external relations. In light of the compounding crises external and internal, one can no longer afford to simply tinker around the edges of the policy content and instruments. A more radical theoretical undertaking is overdue to re-shape, re-define and re-centre the EU's relations with the eastern region, especially put in the context of the new EU's Global Security Strategy and the new aspirations for the 2017 European Neighbourhood summit. The chapters originally published as a special issue in *East European Politics*

The Oxford Handbook of International Relations Christian Reus-Smit, Duncan Snidal, 2010-07-01. The Oxford Handbook of International Relations offers the most authoritative and comprehensive overview to date of the field of international relations. Arguably the most impressive collection of international relations scholars ever brought together within one volume, the Handbook debates the nature of the field itself, critically engages with the major theories, surveys a wide spectrum of methods, addresses the relationship between scholarship and policy making, and examines the field's relation with cognate disciplines. The Handbook takes as its central themes the interaction between empirical and normative inquiry that permeates all theorizing in the field and the way in which contending approaches have shaped one another. In doing so, the Handbook provides an authoritative and critical introduction to the subject and establishes a sense of the field as a dynamic realm of argument and inquiry. The Oxford Handbook of International Relations will be essential reading for all of those interested in the advanced study of global politics and international affairs.

International Political Economy in the 21st Century Roy Smith, Imad El-Anis, Christopher Farrands, 2017-02-10. Understanding of the theories that underpin international political economy (IPE) and their practical applications is crucial to the study of international relations, politics, development and economics. This is a comprehensive and accessible introduction to the field with an engaging and coherent foundation to the subject. It considers traditional and alternative approaches to IPE and, in doing so, elucidates key concepts, assumptions and the intellectual and historical context in which they arose and developed. At all times it makes clear their relevance to issues from trade, finance and government to environment, technology, health, labour, security, migration, development and culture. The book encourages independent reflection and critical thinking through a range of in-text guiding features. In addition, each chapter presents theoretical analysis alongside contemporary issues, helping the reader to relate to the real world of IPE and to better understand how theory helps inform interpretation of it. New to this edition, comprehensively updated to include key coverage of the post-2015

framework of the Sustainable Development Goals the financial crisis and international government responses successful or otherwise to recent challenges fully updated data reflective questions recommended readings concept and example boxes and illustrations new chapters on health migration and labour additional coverage of trade theories and key contemporary issues such as national versus human security economic versus human development and illegal networks in global trade

International Relations ,2002 **The Role of Knowledge Communities in Constructing Asia-Pacific Security** See Seng Tan,2007 This study addresses the dearth of critical and or post positivist perspectives in security studies of and about the Asia Pacific region It demonstrates how regional communities of security specialists and intellectuals including knowledge communities such as ASEAN Institutes of Strategic and International Studies ASEAN ISIS and the Council for Security Cooperation in the Asia Pacific CSCAP have contributed to just such a state centric political imaginary at the expense of alternative ideas while promoting and legitimizing their own identities as authorities on regional security

Review of International Studies ,2005 **National Missile Defense and the Politics of US Identity** Natalie Bormann,2008-12-15 Why adopt a poststructural lens for the reading of the military strategy of national missile defence NMD No doubt when contemplating an attack on US territory by intercontinental ballistic missiles consulting Michel Foucault and critical international relations theory scholars may not seem the obvious route to take The answer to this lies in another question why has there been so much interest and continuous investment in NMD deployment when there is such ambiguity

surrounding the status of threat to which it responds controversy over its technological feasibility and concern about its cost Posed in this manner the question cannot be answered on its own terms the terms given in official accounts of NMD that justify the system's significance on the basis of strategic feasibility studies and conventional threat predictions guided by worst case scenarios Instead this book argues that the preferences leading to NMD deployment must be understood as satisfying requirements beyond strategic approaches and issues In turning towards the interpretative modes of inquiry provided by critical social theory and poststructuralism this book contests the conventional wisdom about NMD and suggests reading the strategy in terms of US identity Presented as an analysis of discourses on threats to national security around which the need for NMD deployment is predominantly framed this book is an effort to let the two fields of critical international relations theory and US foreign policy speak directly to each other It seeks to do so by showing how the concept of identity can be harnessed to an analysis of a contemporary military strategic practice

Hybrid Sovereignty in the Arab Middle East Gokhan Bacik, 2008-07-02 This book provides readers with a fresh analysis of the Arab state by using a new theoretical framework hybrid sovereignty Hybrid sovereignty is used as an analytical tool to explain the survival of traditional patterns and forms of authority within the formal modern statehood The author looks at various issue areas to make his argument citizenship the issue of minorities electoral engineering the failure of central rule tribalism and the lack of impersonal bureaucratic mechanism He concludes that based on the problems at state society level boundaries of statehood the Arab state can be identified as hybrid sovereign

Remembering and Forgetting 1916 Rebecca Graff-McRae, 2010

Remembering and Forgetting 1916 engages with the diverse divergent and at times contradictory discourses of commemoration in Ireland It explores the complex politics of commemoration of four significant events in Irish history the Easter Rising the Battle of the Somme the 1798 Rebellion and the H Block Hunger Strike It asks how the commemorations of these events have become incorporated into present politics in the wake of the Good Friday Agreement The book begins and ends with the Easter Rising The construction of 1916 as the pivotal moment of Irish history identity and memory has had lasting consequences for the Irish definition of political conflict and how this is defined through commemoration In Remembering and Forgetting 1916 it is argued that the ghosts of 1916 are in many ways the ghosts of 1998 This book thus calls forth the ghosts of commemoration and examines how the ghosts of conflict and consensus are used to political ends in the present Publisher
