Pour Une Critique De La Raison Bioeacutethique

Julian Edward Bourg

Pour Une Critique De La Raison Bioeacutethique:

POUR UNE CRITIQUE DE LA RAISON BIOETHIQUE. ,1994

From Revolution to Ethics Julian Bourg,2007-05-14

The French revolts of May 1968 the largest general strike in twentieth century Europe were among the most famous and colourful episodes of the twentieth century Julian Bourg argues that during the subsequent decade the revolts led to a remarkable paradigm shift in French thought the concern for revolution in the 1960s was transformed into a fascination with ethics Challenging the prevalent view that the 1960s did not have any lasting effect From Revolution to Ethics demonstrates that intellectuals and activists turned to ethics as the touchstone for understanding interpersonal institutional and political dilemmas In absorbing and scrupulously researched detail Bourg explores the developing ethical fascination as it emerged among student Maoists courting terrorism anti psychiatric celebrations of madness feminists mobilizing against rape and pundits and philosophers championing human rights Based on newly accessible archival sources and over fifty interviews with men and women who participated in the events of the era From Revolution to Ethics provides a compelling picture of how May 1968 helped make ethics a compass for navigating contemporary global experience Thinking with Marx Today, Volume 2

Lucien Sève,2025-09-12 Instead of abstract man Marx argued that there is an ensemble of societal relations that underpins social formations of various kinds as well as a variety of forms of individuality In this second volume of Thinking with Marx Today Lucien Sève presents what he calls Marx's revolution in anthropology He deftly analyzes the philosophical preconditions and the fundamental concepts of this anthropology This is followed by critiques of Nietzsche Heidegger and contemporary primatology coupled with borrowings from Freud Politzer Vygotsky and contemporary literature on biography Sève's aim is nothing less than to outline a science of human individuality **Marxism, Psychology and Social Science**

Analysis Julian Roche,2018-06-14 Marxism Psychology and Social Science Analysis applies Marxist theory psychology and the work of Lucien Sève to specific research in the social sciences It shows in practical terms what guidance can be offered for social scientific researchers wanting to incorporate Sève's view of personality into their work Providing case studies drawn from different social sciences that give the book significant breadth of scope Roche reviews the impact of Taking Sève Seriously across the study of international relations theory economics law and moral philosophy The book begins by placing the work of Lucien Sève in context and considers the development of psychology in relation to Marxism before going on to summarise the work of Sève in relation to the psychology of personality It considers the opportunities for refreshed research in social relations based on developments by Sève before examining Marxist biography and the implications of Sève's views The book also includes chapters on the social discount rate on constructivism in international relations on the concept of promising in moral philosophy and the Marxist conception of individual responsibility It addresses not only how research should be carried out differently but whether utilising the theoretical framework of other writers even non Marxists can deliver a similar outcome With its use of five distinct case studies to analyse the work of Lucien Sève this unique book will be

of great interest to academics researchers and postgraduate students in the fields of psychology philosophy and social sciences

Ethics Codes in Medicine Ulrich Tröhler, Stella Reiter-Theil, Eckhard Herych, 2019-07-23 First published in 1998 this volume considers the Nuremberg Code in light of new ethical grey areas which have become evident due to recent scientific advancements particularly the questions of DNA and cloning The contributors reflect in 26 articles on the impact of the Code events which prompted it including Japan and more recent ethical issues raised The book contains the results of two European American preparatory workshops for the First World Conference on Ethics Codes in Medicine and Biotechnology October 1997 Freiburg Germany supported by the leading national institutions in the field It aims to stimulate research about codes the effects of codification and other forms of implementing ethics It breaks new ground with interdisciplinary and international discourse on the subject emphasising the need for a complete collection of codes for systematic research and evaluation and filling the gap in literature on the subject to date

Health Governance in Europe Monika Steffen, 2005-11-28 Health constitutes a core element of welfare states and a vital nerve in the trust relation between citizen and their governments Focusing on the health sector this book analyzes the closely interwoven relationship between the European Union and Member States The authors explore the dynamic and multi fold process of de nationalizing health policies and illustrate how European policies develop in a sector that still appears to be under exclusively national competence They describe the multiple forms and ways the Europeanization process takes driven by market integration public health crises and politics of consumer protection The authors also provide a detailed analysis of key topics the pharmaceutical sector market regulation of medical goods and devices food safety the blood provision and plasma industry European politics on bioethics and risk reduction in the field of drug abuse Providing a comprehensive and informed assessment of the Europeanization process in the field of health policies this book will be of interest to students and scholars of health European integration and policy making
