

HW 3.7 – Optimization Problems

1.) Find two numbers whose sum is 10 for which the sum of their squares is a minimum.

2.) Find nonnegative numbers x and y whose sum is 75 and for which the value xy^2 is as large as possible.

3.) A ball is thrown straight up in the air from ground level. Its height after t seconds is given by $s(t) = -16t^2 + 50t$. When does the ball reach its maximum height? What is its maximum height?

4.) A farmer has 2,000 feet of fencing to enclose a pasture area. The field will be in the shape of a rectangle and will be placed against a river where there is no fencing needed. What is the largest area field that can be created and what are its dimensions?

Sustainable Design Through Process Integration Mahmoud M. El-Halwagi, 2017-08-08 Sustainable Design through Process Integration Fundamentals and Applications to Industrial Pollution Prevention Resource Conservation and Profitability Enhancement Second Edition is an important textbook that provides authoritative comprehensive and easy to follow coverage of the fundamental concepts and practical techniques on the use of process integration to maximize the efficiency and sustainability of industrial processes. The book is ideal for adoption in process design and sustainability courses. It is also a valuable guidebook to process chemical and environmental engineers who need to improve the design operation performance and sustainability of industrial plants. The book covers pressing and high growth topics including benchmarking process performance identifying root causes of problems and opportunities for improvement designing integrated solutions enhancing profitability conserving natural resources and preventing pollution. Written by one of the world's foremost authorities on integrated process design and sustainability the new edition contains new chapters and updated materials on various aspects of process integration and sustainable design. The new edition is also packed with numerous new examples and industrial applications. Allows the reader to methodically develop rigorous targets that benchmark the performance of industrial processes then develop cost effective implementations. Contains state of the art process integration and improvement approaches and techniques including graphical algebraic and mathematical methods. Covers topics and applications that include profitability enhancement mass and energy conservation synthesis of innovative processes retrofitting of existing systems design and assessment of water energy and water energy nexus systems and reconciliation of various sustainability objectives

Teaching Data Analytics Susan Vowels, Katherine Leaming Goldberg, 2019-06-17 The need for analytics skills is a source of the burgeoning growth in the number of analytics and decision science programs in higher education developed to feed the need for capable employees in this area. The very size and continuing growth of this need means that there is still space for new program development. Schools wishing to pursue business analytics programs intentionally assess the maturity level of their programs and take steps to close the gap. *Teaching Data Analytics Pedagogy and Program Design* is a reference for faculty and administrators seeking direction about adding or enhancing analytics offerings at their institutions. It provides guidance by examining best practices from the perspectives of faculty and practitioners. By emphasizing the connection of data analytics to organizational success it reviews the position of analytics and decision science programs in higher education and to review the critical connection between this area of study and career opportunities. The book features A variety of perspectives ranging from the scholarly theoretical to the practitioner applied. An in depth look into a wide breadth of skills from closely technology focused to robustly soft human connection skills. Resources for existing faculty to acquire and maintain additional analytics relevant skills that can enrich their current course offerings. Acknowledging the dichotomy between data analytics and data science this book emphasizes data analytics rather

than data science although the book does touch upon the data science realm Starting with industry perspectives the book covers the applied world of data analytics covering necessary skills and applications as well as developing compelling visualizations It then dives into pedagogical and program design approaches in data analytics education and concludes with ideas for program design tactics This reference is a launching point for discussions about how to connect industry s need for skilled data analysts to higher education s need to design a rigorous curriculum that promotes student critical thinking communication and ethical skills It also provides insight into adding new elements to existing data analytics courses and for taking the next step in adding data analytics offerings whether it be incorporating additional analytics assignments into existing courses offering one course designed for undergraduates or an integrated program designed for graduate students
