Collaborative Creativity

Dorothy Miell, Karen Littleton, 2004. The contributors to this volume adopt a socio-cultural approach to understanding collaborative creativity across a wide range of domains such as music composition, business school-based creative writing, and art, fashion design, theatre production, and web-based academic collaborations. Central to the socio-cultural approach to creativity is the recognition that it is a fundamentally social process. It thus follows that if we are to understand and characterize human creativity, we need to examine the cultural, institutional, and interpersonal contexts that support and sustain such activity. We also need to understand how cultural tools and technologies resource collaborative creativity. The volume offers a distinctive and valuable contribution to this growing field of scholarship by presenting new empirical findings, reviews, and critiques of existing literature together with suggestions for how this field should develop.
