Through the identification of mythic themes, mythemes and patterns within these novels, González shows that these works evoke the female life cycle and develop current perceptions of the female maturational experience. As a result, Salcedo González makes an important contribution in establishing the cultural significance of young adult literature in the world of classical reception. These novels, all written by women, also inflect or interpret the myth in ways influenced by their contemporary contexts, specifically the impact of the novels' target readership on the aspects of the myth that are either emphasised (e.g. Persephone's descent into the underworld, her existence there and her re-ascent) or de-emphasised (e.g. the mourning and wanderings of Demeter). This book makes original methodological contributions through its innovative dual perspective of myth criticism and classical reception to our understanding of the academically neglected genre of young adult literature and the reception of the myth of Persephone. As a result, Salcedo González significantly contributes to establishing the cultural significance of young adult literature within the realm of classical reception.
