Annales Entomologici Fennici , 1983 **Biodiversity** R C Sobti, 2022-12-30 The term biodiversity or biological diversity describes the variety of living beings on Earth encompassing microorganisms plants animals and ecosystems such as coral reefs forests and deserts In fact it also represents a wealth of biological resources available to us Today instead of exploring and preserving its unmapped biodiversity mankind has gone away from mother nature conquering the domain through relentless exploitation This has resulted in an ecological imbalance and thereby has posed serious threat to biodiversity
