## NET-240 (NETACAD CHAPTER 3) EXAM 2025 WITH 100% ACCURATE SOLUTIONS

### Defending the Network

#### 3.1.1

Network Security Professionals - Answer Organizations experience productivity loss when their networks are slow or unresponsive. Business goals and profits are negatively impacted by data loss and data corruption. Therefore, from a business perspective, it is necessary to minimize the effects of hackers with bad intentions.

Network security professionals are responsible for maintaining data assurance for an organization and ensuring the integrity and confidentiality of information. Ironically, hacking has had the unintended effect of creating a high demand for network security professionals. As a result of increasing hacker exploits, the sophistication of hacker tools, and because of government legislation, network security solutions developed rapidly in the 1990s, creating new job opportunities in the field of network security.

Security specialist job roles within an enterprise include Chief Information Officer (CIO), Chief Information Security Officer (CISO), Security Operations (SecOps) Manager, Chief Security Officer (CSO), Security Manager, and Network Security Engineer. Regardless of job titles, network security professionals must always stay one step ahead of the hackers:

They must constantly upgrade their skill set to keep abreast of the latest threats.

They must attend training and workshops.

They must subscribe to real-time feeds regarding threats.
