Stories Cli Fi Novel:

Cli-Fi and Class Debra J. Rosenthal, Jason de Lara Molesky, 2023-10-09 Since its emergence in the late twentieth century climate fiction or cli fi has concerned itself as much with economic injustice and popular revolt as with rising seas and soaring temperatures. Indeed with its insistent focus on redressing social disparities cli fi might reasonably be classified as a form of protest literature. As environmental crises escalate and inequality intensifies literary writers and scholars alike have increasingly scrutinized the dual exploitations of the earth's ecosystems and the socioeconomically disadvantaged. Cli Fi and Class focuses on the representation of class dynamics in climate change narratives. With fifteen essays on the intersection of the economic and the ecological addressing works ranging from the novels of Joseph Conrad, Cormac McCarthy and Octavia Butler to the film Black Panther and the Broadway musical Hadestown this collection unpacks the complex ways economic exploitation impacts planetary well being and the ways climatic change shapes those inequities in turn. **(Eco)Anxiety in**

Nuclear Holocaust Fiction and Climate Fiction Dominika Oramus, 2023-07-07 Eco Anxiety in Nuclear Holocaust Fiction and Climate Fiction Doomsday Clock Narratives demonstrates that disaster fiction, nuclear holocaust and climate change alike, allows us to unearth and anatomise contemporary psychodynamics and enables us to identify pretraumatic stress as the common denominator of seemingly unrelated types of texts. These Doomsday Clock Narratives argue that earth's demise is soon and certain. They are set after some catastrophe and depict people waiting for an even worse catastrophe to come. References to geology are particularly important in descriptions of the landscape the emphasis falls on waste and industrial bric a brac which is seen through the eyes of a future posthuman archaeologist. Their protagonists have the uncanny feeling that the countdown has already started and they are coping with both traumatic memories and pretraumatic stress. Readings of novels by Walter M Miller, Nevil Shute, John Christopher, J G Ballard, George Turner, Maggie Gee, Paolo Bacigalupi, Ruth Ozeki and Yoko Tawada demonstrate that the authors are both indebted to a century old tradition and inventively looking for new ways of expressing the pretraumatic stress syndrome common in contemporary society. This book is written for an academic audience postgraduates, researchers and academics specialising in British Literature, American Literature and Science Fiction Studies. **Fiction and the Sixth Mass Extinction** Jonathan Elmore, 2020-04-01 Fiction and the Sixth Mass Extinction is one of the first works to focus specifically on fiction's engagements with human driven extinction. Drawing together a diverse group of scholars and approaches this volume pairs established voices in the field with emerging scholars and traditionally recognized climate fiction cli fi with texts and media typically not associated with Anthropocene fictions. The result is a volume that both engages with and furthers existing work on Anthropocene fiction as well as laying groundwork for the budding subfield of extinction fiction. This volume takes up the collective insistence on the centrality of story to extinction studies. In various and disparate ways each chapter engages with the stories we tell about extinction about the extinction of animal and plant life and about the extinction of human life itself. Answering the call to action of extinction

studies these chapters explore what kinds of humanity caused this event and what kinds may live through it what cultural assumptions and values led to this event and which ones could lead out of it what relationships between human life and this planet allowed the sixth mass extinction and what alternative relationships could be possible *Handbook of Climate Change Communication: Vol. 2* Walter Leal Filho, Evangelos Manolas, Anabela Marisa Azul, Ulisses M. Our Shared Storm Andrew Dana Hudson, 2022-04-05 Through speculative fiction five interlocking novelettes explore the possible realities of our climate future. What is the future of our climate? Given that our summers now regularly feature Arctic heat waves and wildfire blood skies, polar vortex winters that reach all the way down to Texas and 100 year storms that hit every few months, it may seem that catastrophe is a done deal. As grim as things are however we still have options. Combining fiction and nonfiction and employing speculative tools for scholarly purposes Our Shared Storm explores not just one potential climate future but five possible outcomes dependent upon our actions today. Written by speculative fiction writer and sustainability researcher Andrew Dana Hudson Our Shared Storm features five overlapping fictions to employ a futurist technique called scenarios thinking. Rather than try to predict how history will unfold picking one out of many unpredictable and contingent branching paths it instead creates a set of futures that represent major trends or counterposed possibilities based on a set of climate modeling scenarios known as the Shared Socioeconomic Pathways (SSPs). The setting is the year 2054 during the Conference of the Parties global climate negotiations a.k.a. The COP in Buenos Aires, Argentina. Each story features a common cast of characters but with events unfolding differently for them and human society in each alternate universe. These five scenarios highlight the political, economic and cultural possibilities of futures where investments in climate adaptation and mitigation promised today have been successfully completed, kicked down the road or abandoned altogether. From harrowing to hopeful these stories highlight the choices we must make to stabilize the planet. Our Shared Storm is an experiment in deploying practice based research methods to explore the opportunities and challenges of using climate fiction to engage scientific and academic frameworks.

Climate Fiction and Cultural Analysis

Gregers Andersen,2019-09-25 Climate Fiction and Cultural Analysis argues that the popularity of the term climate fiction has paradoxically exhausted the term s descriptive power and that it has developed into a black box containing all kinds of fictions which depict climatic events and has consequently lost its true significance Aware of the prospect of ecological collapse as well as our apparent inability to avert it we face geophysical changes of drastic proportions that severely

challenge our ability to imagine the consequences This book argues that this crisis of imagination can be partly relieved by climate fiction which may help us comprehend the potential impact of the crisis we are facing Strictly assigning climate fiction to fictions that incorporate the climatological paradigm of anthropogenic global warming into their plots this book sets out to salvage the term s speculative quality It argues that climate fiction should be regarded as no less than a vital supplement to climate science because climate fiction makes visible and conceivable future modes of existence within worlds not only deemed likely by science but which are scientifically anticipated Focusing primarily on English and German language fictions Climate Fiction and Cultural Analysis shows how Western climate fiction sketches various affective and cognitive relations to the world in its utilization of a small number of recurring imaginaries or imagination forms This book will be of great interest to students and scholars of ecocriticism the environmental humanities and literary and culture studies more generally

The Heatstroke Line: A CLI-Fi Novel Edward L. Rubin, 2015-09-29. Edward Rubin has temporarily exchanged his academic cap for a novelist's hat and has written a powerful cli fi novel set in the near future. He knows that *Mad Max*, *The Hunger Games*, *Waterworld*, *The Walking Dead*, and innumerable other books, movies, and TV series attract large audiences by portraying a future where society has been devastated by war, disease, environmental calamity, or supernatural disaster. Such post-apocalyptic tales constitute an important and widely popular genre.
