**The Burning Answer** Keith Barnham, 2015-05-15 Our society faces a choice. We could be enjoying a sustainable lifestyle but we have chosen not to. In three generations we have consumed half the oil produced by photosynthesis over eight million years. In two generations we have used half our uranium resources. With threats from global warming, oil depletion, and nuclear disaster we are running out of options. Solar power as Keith Barnham says is our necessary solution. Barnham explains that the roots of solar energy lie in a little known equation  $E = hf$  an equation which was coincidentally celebrated and explained to the world by Einstein in the same year he discovered  $E = mc^2$ . He alleges that the former equation has been overlooked in favor of the latter much to our detriment and Barnham is here to offer us a solution. We can still turn things around and solar energy is the key. In this provocative, inspiring, passionately argued book Keith Barnham outlines actions that any one and all of us can take to make an impact now and on future generations. The Burning Answer is a solar manifesto for the new climate aware generation and a must read for climate change skeptics.
