Pddc Civil 2013:

Flood Risk and Community Resilience Lindsey Jo McEwen, 2024-03-15 This book details the impact of flooding on our environment and the ways in which communities and those that work with them can act to manage the associated risks. Flooding is an increasingly significant environmental hazard which inflicts major costs to the economies and livelihoods of developed countries. This book explores how local communities can identify, manage and adapt to the ever-increasing damage flooding causes. Focusing on the future role of local communities, the benefits and challenges of their involvement and the potential areas of transformation, this book provides insights into the efficacy of interdisciplinary and transdisciplinary working. Alongside research into similar environmental hazards, this book also draws upon the author's own knowledge of flood risk management in distinctive non-contiguous interdisciplinary settings. The chapters draw together a different and distinctive set of interdisciplinary themes in flood risk management and social resilience. In doing so, it strives to communicate the different ways of thinking that can usefully contribute to flood risk management. This book would be ideal for those researching flood risk management alongside scholars and non-scholars alike who are interested in finding ways of adapting to environmental hazards working with local communities.

Propostas de modelos de soluções de problemas fundiários urbanos Rachel Lopes Queiroz Chacur, 2021-03-17 Este livro apresenta sugestões de modelos de soluções de conflitos fundiários urbanos a partir de um diagnóstico de conflitos judiciais pela posse e propriedade de imóveis de uma determinada cidade e Comarca do Poder Judiciário incontestável, o cenário de ilegalidade e irregularidade de imóveis nas cidades brasileiras levando ao aumento de litigiosidade contida de conflitos pelo acesso ao direito mínimo de moradia nos rgos judiciais. A autora descreve uma nova metodologia científica de pesquisa de dados primários de rgos públicos do Poder Executivo e Poder Judiciário com o objetivo de oferecer instrumentos e validar os resultados para conferir uma visão interdisciplinar de resolução de conflitos fundiários urbanos. Do mesmo modo, os testes de validade durante a análise factual e empírica dos processos em si mesmos, conteúdo e rito processual demonstram a urgência de alterações legislativas apontando a análise estrutural e funcional dos ritos e rgos públicos no Brasil. Essa vertente de pesquisa traz a conduta assertiva de sugestões de conceitos, técnicas e formatos de procedimentos de resolução de conflitos fundiários urbanos judicializados e não judicializados no Poder Judiciário com uma visão estratégica e preventiva de soluções de problemas ambientais e fundiários urbanos e principalmente a proposta de descentralização administrativa de serviços ambientais e fundiários oferecidos por agentes habilitados e instituídos em um sistema integrado dos entes federativos desde que mantida a regulamentação da legalidade registral e regularização ambiental e fundiária dos imóveis urbanos pelo Estado, uma proposta inovadora de gestão pública administrativa e forense com potencial de implantação nos rgos judiciais e executivos vinculados aos Estados e Municípios contribuindo com a distribuição equitativa de moradia com o planejamento urbano e o desenvolvimento sustentável das cidades brasileiras.
