Williams,Jing-Jen Wang,1997 [Assessing Adolescent and Adult Intelligence](#) Alan S. Kaufman,Elizabeth O. Lichtenberger,2005-08-05 The classic text now updated with a new interpretive approach to the WAIS III Assessing Adolescent and Adult Intelligence the classic text from Alan Kaufman and Elizabeth Lichtenberger has consistently provided the most comprehensive source of information on cognitive assessment

of adults and adolescents. The newly updated Third Edition provides important enhancements and additions that highlight the latest research and interpretive methods for the WAIS III. Augmenting the traditional sequential and simultaneous WAIS III interpretive methods, the authors present a new approach derived from Cattell Horn Carroll (CHC) theory. This approach combines normative assessment performance relative to age peers with ipsative assessment performance relative to the person's own mean level. Following Flanagan and Kaufman's work to develop a similar CHC approach for the WISC IV, Kaufman and Lichtenberger have applied this system to the WAIS III profile of scores along with integrating recent WAIS III literature. Four appendices present the new method in depth. In addition to a detailed description, the authors provide a blank interpretive worksheet to help examiners make the calculations and decisions needed for applying the additional steps of the new system and norms tables for the new WAIS III subtest combinations added in this approach. *Assessing Adolescent and Adult Intelligence* remains the premier resource for the field, covering not only the WAIS III but also the WJ III, the KAIT, and several brief measures of intelligence as well as laying out a relevant up-to-date discussion of the discipline. The new theory-based interpretive approach for the WAIS III makes this a vital resource for practicing psychologists as well as a comprehensive text for graduate students.

Key topics include the relationship of vocabulary acquisition to phonological awareness and to morphological processing, the role of parents in supporting early language development, and considerations in teaching English language learners and children with reading disabilities.

The Crisis in Youth Mental Health Hiram E. Fitzgerald, Kristine Freeark-Zucker, Robert Zucker, 2005-12-30

A recent report to the nation from the Commission on Children at Risk warned that rising rates of mental and emotional problems among U.S. children and teenagers signal a crisis for the country. Depression, anxiety, attention deficit, conduct disorders, suicidal thinking, and other serious psychological problems are striking more and more children and youths. In these volumes, dozens of experts describe in clear language what the maladies are, how they develop, what fuels them, and what can be done to stem the tide or eradicate these disorders. Particular situations are examined and the roles of parents, family, peers, childcare leaders, school personnel, and programs as well as pediatricians are discussed.
