**Value-Investing** - Cunningham Lawrence A.,2013 [Value Investing](#) Lawrence A. Cunningham,2005-12-20 [Stock Market Investing Simplified](#) Bharadwaj Vanamali,2020-08-29 Most often stock market investing is looked at as a complicated mind bending mystery that can only ever be truly understood if you were a financial genius with years of experience The usual investment advice that you get is either so perplexing that the whole thing goes over your head or an over simplified one liner like buy right and sit tight which is actually great advice by the way But how exactly do you buy right That's what I've tried to answer in this book from a beginner's perspective Every other stock market book or blog tells you what to look for in a stock But none of them tell you where to start It's not like you can analyse every publicly trading company which in the US alone is over 3600 companies So how do you shortlist the stocks you would want to analyse in the first place Do you start with analyst recommendations or do you comb through thousands of companies and select a few for research And if you do have that kind of time and patience what would be your criteria for selection This book is my answer to all those questions In this step by step beginner's guide we will look at how you can use quantitative and qualitative analysis to narrow down on undervalued and efficient stocks without the speculation and without wracking your brains In addition to that we will also

look at 10 Keys To Successful Investing in the stock market At the end of the evaluation you will have a list of stocks ranked in order of their performance and value This is the simplest and probably the most intuitive approach to stock evaluation It can be applied to stocks in any sector or industry trading on any stock exchange in the world This is unlike some of the other evaluation models that can only be used on specific company types or business models This is why it is so popular among analysts and investors alike So go ahead and pick up your copy and we ll get started
