Plsc Question Paper Science 2013:

The Political Effects of Entertainment Media Anthony Gierzynski, 2020-07-08 Entertainment media are rife with material that touches on the political. The stories with which we entertain ourselves often show us for better or worse that everything can be solved by the rise of an individual hero and that the best way to deal with a bad guy with a gun is a good guy with a gun. Our stories portray individuals along the lines of gender, racial, and ethnic stereotypes, offer us villains that are one-dimensional characters driven by evil, and show us politicians who are almost always corrupt, self-serving, and/or incompetent. They offer up models for how to deal with oppressive authority and they typically portray worlds that are just where those who do the right thing come out on top. Entire entertainment genres with their shared story-telling conventions and common plot devices provide lessons and perspectives that are relevant to how the public sees political issues. The stories that entertain us show us all these things and more, but to what effect? Does the pervasive politically relevant content that can be found not just in political entertainment shows like *House of Cards* but also in entertainment like *Game of Thrones* that on the surface has nothing to do with modern politics affect people's perspectives on the political world? That is the central question of this volume. This book discusses the type of content in entertainment media that has the best chance of influencing political beliefs, draws from the work of scholars in a number of disciplines in order to forge a theory explaining how and when entertainment media will affect political perspectives, and presents a series of empirical studies using experiments and surveys that demonstrate the effect of politically relevant content in shows such as *Game of Thrones*, *House of Cards*, *The Daily Show*, and *The Colbert Report* in genres such as science fiction and through pervasive villain and leader character types.

The Mediation of Poverty Joanna Redden, 2014-02-19 *The Mediation of Poverty: The News, New Media, and Politics* discusses the influence of the increasing use of digital technologies on media and political responses to poverty in the United Kingdom and Canada. Considering poverty politics at symbolic and structural levels, Joanna Redden uses a frame analysis of mainstream and alternative news content to identify which narratives dominate poverty coverage, what is missing from mainstream news coverage, and what can be learned by looking at alternative sources of news and information. *The Mediation of Poverty* argues that news coverage privileges and embeds neoliberal approaches to the issue of poverty in Canada and the United Kingdom. Interviews with journalists, politicians, researchers, and activists enable discussion on a micro level of the changing nature of news politics and activism and how these changes influence poverty politics. Redden raises concerns about how the speed of digitally mediated working environments is reshaping even foreclosing opportunities for communication, reflection, and contestation in a way that reinforces the dominance of market-based thinking and limits political responses to poverty.

Truth in Advertising? Barbara Allen, Daniel Stevens, 2018-10-18 This book represents the first systematic effort to examine 1 the factual accuracy of the claims made in an entire political advertising campaign, 2 the visuals and sound cues used in that advertising and their relationship with the tone and accuracy of ads, and 3 the impact of

the accuracy of claims on what people know and how they vote in a real campaign The research is based on several years of labor intensive coding of the factual accuracy of every claim made in the presidential ads in the 2008 election as well as the ads for the races for the US Congress in Minnesota We show how the accuracy of political ad claims the visuals and sound of ads and ad tone particularly negativity are related to voting behavior We argue that understanding how the accuracy of political ad claims affects voters is now more important than ever This research has steered clear of the normative question of what such putative gains in knowledge represent however Does the content of negative advertising enhance voter capacities such as the ability to locate candidates issue positions accurately or state reasons to like or dislike candidates based on accurate information about the candidates traits or issue stands Does the accuracy of the information in political advertising matter to voting behavior or vote choice whether turnout goes up or down Would voting more while knowing less that is true be sufficient in a democracy In studying the effects of advertising tone such questions about advertising tone have not been asked Our book redresses this lacuna We show that negative advertising is more likely to make inaccurate claims We show that ads making inaccurate claims also use a larger number of visual and sound distortions perhaps tying up more cognitive capacities while pressing their untruthful arguments We show links between inaccurate advertising and aggregate turnout individual turnout and individual political knowledge The news is not good in an age of post factual democracies

Ghanaian Politics and Political Communication , Samuel Gyasi Obeng, Emmanuel Debrah, 2019-08-23

Working from multidisciplinary and interdisciplinary perspectives especially from the social sciences media studies discourse analysis text grammar folklore performing arts and linguistics the authors of the volume investigate and illuminate pertinent issues on democratization elections and electioneering campaigns and the constitution of order in an African context The strategies through which political actors and the media speak about important policy issues such as healthcare infrastructure education and finance during presidential sessional addresses and political campaigning are also elucidated The extent of political ecologies impact on general elections on policy issues and on split ticket voting especially what causes it to happen and its impact on who gets elected and the consequent impact on party unity or disintegration are also given scholarly attention Also elucidated are is the entwining of language power liberty ideology and representation and issues deemed politically nerve wrecking and capable of entrapping political actors and causing the citizenry to either lose confidence in them or even call for their resignation
